He has been harassing me and other local left wing homeless advocates. Going after our families and jobs. He if a process server and posted a lawsuit my aunt has levied against her public ally online. While barely redacting her name but not enough hat I couldnt read it. He recently posted many semi nude photos of a woman he was harassing to a local Facebook group to intimidate her showing he found her instagram. If you google Darius you will see countless accounts of his misconduct and not only that but many lawsuits levied against him for harassment. However The worst thing he has done is be disingenuous, he recently filmed three homeless men who had housing vouchers inside one of his properties. Asked them many questions about their well being, but then of course didn't rent the apartment to them, used them for his political purpose and moved on. Could you imagine being turned away in that manner from a possible roof over your head?

> He did backgrounds checks on me, found where I lived and where my mother worked. Tried to find my information but it was secure. Called my moms job at the local CHP office inquiring about her.
>
> He has many clients that support him because he allows some low income folks to rent. However he does many interesting things with his properties. One he had in the Bay Area was specifically for sex offenders. However he then had the area over time rezoned so only his building could hold these folks and he continuously took advantage of an already low group.
