---

I just learned of plans for moratorium on towing vehicles w expired registration and unpaid parking tickets. What is the intention behind this change? This idea puts the problem of homeless vehicle dwellers in the front yards of all of our neighborhoods. It also nullifies all of our existing parking restrictions. We need to expand resources to identify safe parking sites and continue to ENFORCE our existing laws instead of "giving up". How about instead of allowing all vehicles to park anywhere they want for as long as they want without consequence, you identify the problem vehicles (w tickets and inability to pay the minimal registration cost) and fast track those people into treatment programs.

No one should be living in their vehicles on our neighborhood streets. Just last week I caught an rv guy dumping his black tank on Doyle st. Remocing penalty around parking restriction solves nothing
