---

Dear Community Advisory Committee on Homelessness members,

I support programs which organize emergency housing of sleeping in vehicles on private property but don't agree with it on public streets in the Santa Cruz city limits. I believe the enforcement of vehicle code regulations including towing vehicles which have multiple parking violations or no registration should be our community's policy and continue.
No enforcement will not solve homelessness and serves only to decrease the quality of living for everyone. The current policy has become lax and is not equally enforced. One just has to look at the state of our streets as evidence of what looser restrictions will bring. If anything we need to up the enforcement of our existing laws not reduce their efficacy.

Sean Davis
