EXECUTIVE SUMMARY

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (Phase I ESA) for Linc Felker, LP (Client or User) of a commercial property located at 150 Felker Street, in the City of Santa Cruz, Santa Cruz County, California (the "Subject Property"). The Subject Property's Assessor's Parcel Number (APN) is 008-181-23.

The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (US EPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) International E1527-21 scope of work.

According to the User, the User is a prospective purchaser of the Subject Property and the Phase I ESA is being performed to qualify for landowner liability protections under CERCLA as well as identify business risks related to the Subject Property associated with environmental conditions.

PROPERTY INFORMATION	
Property Name:	Commercial Structure
Street Address:	150 Felker Street, Santa Cruz, California Figures 1 through 4
APN:	008-181-23
Reported Site Acreage:	0.4 acre (17,859 square feet)
Historically and Additionally Associated Addresses:	None identified
Current Use/Occupant:	Commercial use occupied by two music studios
Groundwater Depth:	Five (5) feet below ground surface (bgs)
Groundwater Flow Direction:	Variable; northwest and southwest

STRUCTURE INFORMATION	
Number of Structures and Approx. Square Footage:	One structure totaling 5,600 square feet in size
Year Constructed:	1975
Number of Floors/Stories:	One
Number of Residential Units:	None
Number of Commercial/Industrial Units:	Two

POTENTIAL CONCERNS	
Site Reconnaissance/Interviews (Section 3.0):	None
Historical (Section 4.0):	None
Regulatory Database (Section 5.0):	None
Agency Record (Section 6.0):	None
Considerations Beyond Scope (Section 7.0):	Based on the age of the on-site structure, there is a potential for asbestos-containing building materials (ACMs) and lead based paints (LBP) at the Subject Property; however, no testing was completed as part of this report.

Suspect ACMs were observed in the form of drop ceiling panels, stucco, and tile flooring and associated mastics. All building materials and painted surfaces appeared in good condition at the time of our site reconnaissance. Individual suspect materials would need to be tested as part of an asbestos survey or lead based paint survey prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos or lead based paint.

Findings and Conclusions

EFI has performed a Phase I ESA in conformance with the scope and limitations of ASTM International E1527-21, at 150 Felker Street, Santa Cruz, California, the Subject Property. It is EFI's opinion that no exceptions to or deletions from this practice that would alter the findings of this assessment were identified.

This assessment has revealed no evidence of significant data gaps, recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) in connection with the Subject Property.

Recommendations

Based on the foregoing, no additional investigation is recommended at this time.

1.0 INTRODUCTION

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (Phase I ESA) for a commercial property located at 150 Felker Street, in the City of Santa Cruz, Santa Cruz County, California (the "Subject Property"; Figures 1 through 4).

This report has been prepared for the sole use of Linc Felker, LP (Client or User).

According to the User, the User is a prospective purchaser of the Subject Property and the Phase I ESA is being performed to qualify for landowner liability protections under CERCLA as well as identify business risks related to the Subject Property associated with environmental conditions.

1.1 PHASE I ESA PURPOSE AND OBJECTIVES

The research conducted for this study and the report prepared are in general conformance with the United States Environmental Protection Agency (US EPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) International E1527-21 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability" (ASTM, 2021). An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard.

In order to maintain landowner liability protections, the User also has the following continuing obligations: "(1) No disposal of hazardous substances can occur after the person acquires the property; (2) Provide all legally required notices with respect to the discovery or release of any hazardous substances at the facility; (3) Exercise appropriate care with respect to hazardous substances by taking reasonable steps to stop any continuing release; prevent any threatened future releases; and prevent or limit human, environmental, or natural resource exposure to any previously released hazardous substance; (4) Provide full cooperation, assistance, and access to persons who are authorized to conduct response actions or natural resource restoration (including the cooperation and access necessary for the installation, integrity, and maintenance of any complete or partial response actions or natural resource restoration); (5) Comply with any land use restrictions established or relied on in connection with the response action, and not impede the effectiveness or integrity of any institutional control employed at the vessel or facility in connection with a response action; and (6) Comply with any request for information or administrative subpoena issued under CERCLA" (ASTM, 2021).

The goal of this process is to identify any (1) significant data gaps, (2) recognized environmental conditions (RECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) historical recognized environmental conditions (HRECs) associated with the Subject Property. These terms as defined by ASTM are discussed below.

This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

- A **significant data gap** is defined as "a data gap that affects the ability of the environmental professional to identify a recognized environmental condition" (ASTM, 2021).
- A **recognized environmental condition (REC)** is defined as "...(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at

the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment" (ASTM, 2021).

- A **controlled recognized environmental condition (CREC)** is defined as a "recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)" (ASTM, 2021).

- A **historical recognized environmental condition (HREC)** is defined as "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition" (ASTM, 2021). The HREC designation requires the comparison of residual contamination concentrations, if any, to current regulatory standards.

- A ***de minimis* condition** is defined as "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition" (ASTM, 2021).

- A **business environmental risk (BER)** is defined as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice" (ASTM, 2021).

In order to identify environmental conditions at the Subject Property, the Phase I ESA includes a site inspection, interviews with parties familiar with the Subject Property, historical research into the past uses of the Subject Property, and an environmental records search with regard to the Subject Property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI provides an opinion regarding the potential for non-scope considerations including but not limited to asbestos containing materials, lead-based paints, mold, radon, methane, and wetlands as they relate to the Subject Property.

1.2 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. Conducting interviews with knowledgeable parties and reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap. Further, it is assumed the records provided by various data sources inquired with during the preparation of this report, including but not limited to public agencies, constitute all responsive records for the Subject Property within the respective data sources' repositories.

This assessment has been conducted, in part, based on information, data or reports provided or prepared by others. EFI reviews and interprets these documents in good faith and relies that the provided data and documents are true, accurate, and complete.

1.3 LIMITATIONS AND EXCEPTIONS

This report has been prepared in accordance with generally accepted environmental methodologies and practices referred to in ASTM E1527-21 and contains all of the limitations inherent in these methodologies. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost. The possibility remains that unreported disposal of waste, chemicals, or other materials, or other activities impairing the environmental condition of the Subject Property may have occurred which could not be identified.

Certain environmental conditions are impossible to visually identify; their presence can be verified only by testing and analysis. EFI can make no direct inferences as to the subsurface conditions at the Subject Property based on the Phase I scope of work, which does not include a physical investigation of the subsurface. Conditions other than those observed may exist in inaccessible or unobserved areas of the Subject Property. During site reconnaissance, materials identified on the Subject Property were not disturbed and underlying conditions were not observed. The findings of this report cannot be extended to portions of the Subject Property that were not directly observed.

This assessment is limited by the availability of information at the time of the assessment. The conclusions and recommendations presented in this report are based on EFI's professional judgement. Nothing in this report, including but not limited to EFI's conclusions and recommendations, should be considered or construed as legal advice. Unless otherwise stated in the report, third-party liabilities have not been assessed within the scope of work.

Unless otherwise stated in the report, environmental conditions at the Subject Property were assessed assuming the Subject Property use remains the same, and no redevelopment or new construction occurs at the Subject Property. Should there be a substantial change in the functional utilization of the Subject Property, or if additional improvements are planned, the conclusions presented herein may not be valid.

No warranties, expressed or implied, are made as to the professional services provided under the terms of EFI's contract(s) or specified in this report. Further, EFI cannot warrant against undiscovered environmental liabilities. Environmental conditions at the Subject Property were assessed within the context of EFI's contract(s), the scope of work authorized by the Client, and existing environmental regulations of applicable jurisdiction(s) as of the date of the report.

Regulatory requirements, regulations and guidance are subject to change subsequent to the date of the report. Unless otherwise stated in the report, evaluating compliance of past, present or future owners or operators with applicable local, provincial and federal government laws and regulations was not included within the scope of the assessment. Unless otherwise stated in the report, this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may or should exist on the Subject Property.

All components of this report, including but not limited to text, signatures, certifications, figures, tables, attachments, appendices, supporting documents and addenda, are integral to the reporting of the assessment. Certain portions of this report, particularly tables and figures, may utilize color to fully convey technical information. This report may not be reproduced, except in full, without written approval of EFI.

1.4 RELIANCE

All reports, both verbal and written, are for the sole benefit of Linc Felker, LP. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EFI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with EFI granting reliance rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against EFI, its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with EFI's Contract and Terms and Conditions executed October 4, 2024 which authorized this assessment.

1.5 USER'S RESPONSIBILITIES

The US EPA AAI and ASTM International E1527-21 Standards describe tasks to be performed by the User or on behalf of the User seeking to qualify for CERCLA liability. A User may include, without limitation, a potential purchaser of Subject Property, a potential tenant of Subject Property, an owner of the Subject Property, a lender, or a property manager. These tasks include the following:

- The User should obtain and review Land Title Records and Judicial Records for Environmental Liens and Activity and Use Limitations (AULs) by relying on Transaction-Related Title Insurance Documentation Such as Preliminary Title Reports and Title Commitments or Title Search Information Reports Such as Condition of Title, Title Abstracts, and AUL/Environmental Lien Reports. If environmental liens or AULs encumbering the Subject Property or in connection with the Subject Property are identified, the User should provide that information to the Environmental Professional (EFI).

- The User should provide the Environmental Professional (EFI) with any specialized or actual knowledge the User has with regard to RECs, environmental liens, or AULs in connection with the Subject Property.

- If the User is aware of any commonly known information in the community about the Subject Property with respect to RECs, the User should provide the information to the Environmental Professional (EFI).

- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the Subject Property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the Subject Property being affected by hazardous substances or petroleum products.

Discussion of items provided by the User during this assessment, if any, are included in Section 3.5.

2.0 SUBJECT PROPERTY DESCRIPTION

The site and legal descriptions are described below to define Subject Property location and boundaries. Using these boundaries, current and historically associated addresses identified in the research from this assessment are listed. Lastly, the physical settings and hydrology information for the Subject Property are detailed below.

2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property is located 465 feet west of the Ocean Street and Felker Street intersection, in the City of Santa Cruz (Figures 1 and 2).

The Subject Property is approximately 0.4 acre (17,859 square feet) in size and is developed with one single-story commercial structure, which is approximately 5,600 square feet in total size. The structure is currently occupied by two unnamed music studios.

The remaining portions of the Subject Property consists of an asphalt paved parking lot on the eastern portion and general landscaping on the southern, western, and northern portions.

The surrounding area is developed with a mix of commercial and residential properties (Figures 3 and 4).

2.2 LEGAL DESCRIPTION

According to the Santa Cruz County Assessor's Office, the Subject Property is located in the City of Santa Cruz, and is identified by Assessor's Parcel Number (APN): 008-181-23.

A legal description was not identified during the municipal records review and was not provided by User or property management.

The Subject Property information is provided in Appendix A.

2.3 CURRENT AND HISTORICAL ADDRESSES

EFI was provided a Subject Property address of 150 Felker Street, Santa Cruz, California by the Client. During the course of EFI's research for this project, no other current or historical addresses were found to be associated with the Subject Property.

2.4 PHYSICAL SETTING

The elevation of the Subject Property is approximately 29 feet above mean sea level (United States Geological Survey [USGS] Santa Cruz, California 7.5-minute topographic quadrangle). Based on review of the GeoCheck Section of the Environmental Data Resources, Inc. (EDR) Radius Map report, the Subject Property is not situated within a 100 or 500-year Federal Emergency Management Agency (FEMA) Flood Zone.

Based on EFI's review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was reported at a leaking underground storage tank (LUST) site (1415 Ocean Street) approximately 0.13 mile southeast of the Subject Property. According to the reviewed First Semi-Annual 2013 Groundwater Monitoring Report, groundwater was detected in 2013 at approximately five (5) feet below ground surface (bgs). Based on regional groundwater data, regional groundwater flow direction is variable and has been noted to flow towards the northwest and southwest; however, local groundwater flow direction may vary.

3.0 Site Reconnaissance and Interviews

The purpose and objective of the site reconnaissance is to collect information from visual and/or physical observations. The site inspection attempts to identify current Subject Property use(s), current hazardous materials storage, evidence of past Subject Property uses, past hazardous material storage, and evidence of other RECs.

3.1 Site Reconnaissance

On October 11, 2024, Tyler Derbish with EFI conducted a site reconnaissance of the Subject Property, accompanied by Alondra Jimenez, the Key Site Manager for the Subject Property.

The visual reconnaissance consisted of observing the boundaries of the Subject Property and systematically traversing the Subject Property to provide an overlapping field of view, wherever possible. The periphery of the on-site structure was observed along with interior accessible common areas, music equipment storage areas, and general storage areas.

The following table describes the Subject Property structure and utility providers.

Structure Name:	Commercial Music Studio
Number of Floors:	One
Total Square Feet of Space (approximate):	5,600 square feet
Construction Date (year):	1975
Construction Type:	Concrete masonry unit (CMU) and wood-framed, concrete slab-on-grade construction with pitched asphalt-shingled roof and large sunlight in the middle of the structure
Interior Finishes Description:	Drywall systems, suspended ceiling tiles, carpet, and ceramic tile flooring
Exterior Finishes Description:	Textured concrete and wood siding
Cooling System Type:	Rooftop heating and ventilation air conditioning (HVAC) units
Heating System Type:	Rooftop HVAC unit
Emergency Power:	None
Potable Water Supply/Source:	Santa Cruz Municipal
Sewage Disposal System:	Santa Cruz Municipal
Natural Gas Service:	Pacific Gas and Electric (PG&E)
Electrical Service:	PG&E

The following table summarize EFI's site reconnaissance observations. Notable Subject Property features observed from the site inspection are depicted on Figure 4. The photograph log of the site reconnaissance is provided in Appendix B.

Yes	No	Observed Feature(s)
✔	☐	Hazardous Substances and Petroleum Products
☐	✔	Drums, Totes, and Intermediate Bulk Containers
☐	✔	Unidentified Substance Containers
☐	✔	Underground Storage Tanks
☐	✔	Aboveground Storage Tanks

Yes	No	Observed Feature(s)
☐	✔	Strong, Pungent, or Noxious Odors
☐	✔	Standing Surface Water/Pits/Ponds/Lagoons and Pools
☐	✔	Drains/Sumps/Clarifiers/Interceptors
☐	✔	Septic Systems/Cesspools
☐	✔	Stained or Corroded Surfaces/Stained Soil or Pavement/Stressed Vegetation
☐	✔	Electrical or Hydraulic Equipment with the Potential to Contain Fluids
☐	✔	Wells (Dry, Irrigation, Injection, Monitoring, Soil Vapor, Abandoned, etc.)
☐	✔	Evidence of Borings
☐	✔	Evidence of Improper Solid Waste Disposal/Dumping/Fill Areas

3.1.1 Interior Observations

The Subject Property contains one onsite structure which is divided in the middle with individual music studios on the north and south portions and a shared central portion. A bathroom and maintenance storage closet were observed in the northeast portion of the Subject Property structure. Small quantities of retail-sized cleaning products were stored in the maintenance closet, based on the limited materials and retail nature, the cleaning supplies are not expected to represent a REC for the Subject Property. Each music studio consists of music and sound equipment and general office equipment.

Within a storage room, three 1-gallon gasoline containers were observed and are reportedly used to fill general landscaping equipment such as a leaf blower and tree trimmer. Based on the limited quantities and reportedly use for landscaping machines, the limited amount of gasoline is not expected to represent a REC for the Subject Property. One 5-gallon propane tank was also stored within the storage room, and is reportedly previously used to fuel a space heater. Additionally, three 5-gallon containers of paint were observed in the storage room, and are reportedly used for minor maintenance and repairs for the Subject Property. Based on the limited quantities and lack of subsurface features, these materials are not expected to represent a REC for the Subject Property.

Some of the drop ceiling panels located in the subject structure had staining, indicating water intrusion and possible microbial growth were present. Please refer to section 7.4 for further information.

No significant hazardous material storage or RECs were observed in the interior portions of the Subject Property.

3.1.2 Exterior Observations

The exterior portion of the Subject Property consists of an asphalt paved parking lot on the eastern portion and general landscaping on the southern, western, and northern portions. Two recreational vehicles (RVs) and multiple vans were parked in the parking lot. The RVs had 5-gallon propane tanks which were used to fuel heating or barbeques associated with the RVs.

The western north and eastern portions of the Subject Property were enclosed by either a chainlink fence or wooden fence.

One stormwater drain was observed on the southeast portion of the Subject Property. No staining was observed around the drain and it does not appear to receive significant surface water runoff from adjoining properties.

No pole or pad mounted transformers or equipment with the potential to contain polychlorinated biphenyls (PCB) were observed on-site.

No RECs were observed in the exterior portions of the Subject Property.

3.1.3 Subject Property and Immediately Surrounding Geography

The surrounding area is a hilly area with a slight topographic slope to the west. No nearby hills or bedrock outcroppings were observed in the area of the Subject Property. The San Lorenzo River is located approximately 300-feet west of the Subject Property. No other lakes, ponds, rivers, or streams were observed in the surrounding area.

3.1.4 Reconnaissance Limitations

No significant limitations were encountered during EFI's reconnaissance of the Subject Property.

3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100 feet of the Subject Property boundary) were visually and physically observed from public right-of-ways and the Subject Property in an attempt to identify RECs. EFI's observations are summarized in the following table:

Direction	Adjoining/ Immediately Surrounding	Historical and Current Address(es)	Current Uses and Historical Uses of Concern
North	Adjoining	None	Highway 1
East	Adjoining	136 Felker Street	Residential
South	Adjoining	145 - 155 Felker Street	Residential
West	Adjoining	None	Santa Cruz Riverwalk

No RECs were readily observable at the adjoining/immediately surrounding properties.

3.3 Surrounding Property Uses (Beyond 100 feet)

The surrounding area is developed with commercial and residential structures.

Our observations of the surrounding properties (beyond 100 feet) did not reveal evidence of potential environmental concerns such as suspect storage facilities, visible dry-cleaning or fueling facilities, or significantly stained surfaces.

3.4 Interviews

The purpose of interviews is to obtain information from those associated with the Subject Property to identify RECs in connection with the Subject Property.

Documentation associated with the following interviews, if any, is provided in Appendix C.

3.4.1 Subject Property Owner

A representative from Property ownership was not available for interview for this assessment.

3.4.2 Key Site Manager/Subject Property Occupant(s)

Ms. Alondra Jimenez, the Key Site Manager, was interviewed during the course of the site reconnaissance conducted on October 11, 2024. According to Ms. Jimenez, no hazardous materials are utilized at the Subject Property. Ms. Jimenez was not aware of any environmental conditions at the Subject Property.

3.4.3 Neighboring Property Owners/Tenants

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the Subject Property is abandoned and/or unsecured land, with evidence of uncontrolled access.

As the Subject Property is currently developed and utilized for commercial purposes, no neighboring property owners/tenants were interviewed during this assessment.

3.5 User Interview, Information, and Provided Documents

EFI provided the User Questionnaire to Mr. Ben Noury with Linc Housing who is the prospective purchaser. According to review of the questionnaire dated October 24, 2024, the following was determined.

AAI Standard Questions	Yes/No
Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law?	No
Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?	No
Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?	Yes
Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	Yes
Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?	No
*Note 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records shall be searched for environmental liens and AULs.	

Mr. Noury specified knowledge of former homeless services use associated with the Subject Property. The specific dates of operation for the former homeless services was not specified but indicated as most recent. Mr. Noury is not aware of any environmental concerns associated with the former operation. For further information regarding former operations of the Subject Property, refer to Section 4.0.

3.5.1 Environmental Lien and AUL Search

Per the ASTM International E1527 standard, the User is responsible for obtaining judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Subject Property.

EFI notes that the User did not engage EFI in obtaining judicial records for environmental liens or AULs that may be associated with the Subject Property. Additionally, these documents were not provided to EFI by the User for review and incorporation into this assessment. The lack thereof or inability to obtain this information represents a data gap. However, based on the quality of historical and regulatory information researched and reviewed as part of this assessment, this data gap is not considered to be significant.

Documentation, if any, is included in Appendix D.

3.5.2 User Provided Documents

No documents were provided to EFI by the User.

User provided documentation, if any, is included in Appendix E.

4.0 HISTORICAL LAND USE

A review of historical data including, but not limited to, those derived from standard historical resources and other historical sources are provided in this section. The objective of obtaining, reviewing, and analyzing historical resources is to develop a history of the previous uses of the Subject Property, adjoining properties, and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the Subject Property. During EFI's historical review, acute attention is paid to the Subject Property. Data relating to the adjoining and immediately surrounding properties (within 100 feet of the Subject Property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the Subject Property itself.

4.1 HISTORICAL SUMMARY

According to EFI's review of the historical resources detailed below, the Subject Property was developed for residential purposes from at least 1892 to 1974. During this time, in at least 1892, the residential development consisted of one dwelling and three associated auxiliary structures. By 1928, the residential development consisted of an auxiliary structure and remained such to at least 1974.

In 1975, the Subject Property was developed with the existing commercial structure. Since development, the Subject Property has been utilized by various office operations. The Subject Property is currently utilized by two music studios.

4.2 HISTORICAL DATA FAILURE

The earliest historical resource obtained during this investigation was a Sanborn map from 1892 which indicated development of the Subject Property for residential uses. The lack of historical data sources for the Subject Property dating back to first developed uses represents historical data source failure. However, it is assumed that prior to 1892, the Subject Property would have been developed for residential use, if not undeveloped. Based on this notion, this limitation is not expected to significantly alter the findings of this investigation.

None of the historical resources utilized as part of this assessment covered the periods from 1892 to 1927, 1932 to 1939, 1941 to 1947, or 1958 to 1965, constituting multiple data gaps. However, based on the residential nature of the Subject Property from at least 1892 to 1974, these data gaps are not expected to significantly alter the findings of this report.

4.3 TOPOGRAPHIC MAP REVIEW

Topographic maps of many portions of the United States date back to 1879 and the series of 7.5-minute quadrangles was officially completed in 1992. More than 55,000 7.5-minute maps were made to cover the 48 conterminous States. This is the only uniform map series that covers the entire area of the United States in considerable detail. Traditionally, topographic maps show both natural and man-made features. Items searched for in each topographic map included, but were not limited to: evidence of tanks, landfills, water drainage pathways, or areas which show significant evidence of fill, et cetera.

Available topographic maps dated from 1954 to 2021 were obtained from EDR and reviewed for this assessment. A summary of EFI's observations is presented in the following table.

The topographic maps are provided in Appendix F.

Year	Subject Property	Adjoining Property Observations & Notable Surrounding Area Observations
1954, 1968, 1973, 1981, 1994	Depicted as shaded indicating urban development with no features or structures.	**North:** Reservoir. By 1968, freeway followed by reservoir. By 1981, reservoir is no longer depicted **East, South, West:** Shaded indicating urban development with no features or structures

Topographic Maps that were created in 2012, 2015, 2018, and 2021 do not depict any structures and only indicate street development and street names. This does not indicate that structures were not present at that time.

4.4 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920s. Items searched for in each photograph included, but were not limited to: evidence of tanks, gasoline stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Available aerial photographs dated from 1931 to 2020 were obtained from EDR and reviewed for this assessment. A summary of EFI's observations is presented in the following table.

The aerial photographs are provided in Appendix G.

Year	Subject Property	Adjoining Property Observations & Notable Surrounding Area Observations
1931, 1940, 1948	Appears to be developed for residential purposes. It should be noted the 1940 aerial photograph is bad quality and exact Subject Property features are not visible.	**North:** Agricultural land **East:** Residential **South:** Residential **West:** Agricultural. By 1948, unimproved land It should be noted the 1940 aerial photograph is bad quality and exact adjoining/ surrounding area features are not visible.
1956, 1968, 1974	Appears to be unimproved with heavy vegetation in the western portion and residential development in the eastern portion. By 1974, the heavy vegetation is removed.	**North:** Unimproved land **East:** Residential **South:** Residential **West:** Unimproved land
1982, 1993, 2005, 2009, 2012, 2016, 2020	Appears to be developed with the existing structure.	**North:** Heavily vegetated land followed by freeway **East:** Residential **South:** Residential **West:** Heavily vegetated land

4.5 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York (Sanborn Map) for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn map coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn map coverage is not available in newer and more rural communities.

Sanborn map coverage was obtained from EDR from 1892 to 1971 and reviewed for this assessment. A summary of EFI's observations is presented in the following table.

The Sanborn map search is provided in Appendix H.

Year	Subject Property	Adjoining Property Observations & Notable Surrounding Area Observations
1892	Depicted with one dwelling, one shed, one outhouse, and one associated auxiliary structure.	**North, West:** Not depicted **East:** Dwelling and associated outhouse **South:** Unimproved land The north and east surrounding areas are not depicted.
1905	Not depicted.	**North, West, South:** Not depicted **East:** Dwelling and three associated auxiliary structures The north, east, and south surrounding areas are not depicted.
1928, 1950, 1957, 1966, 1971	Depicted with one auxiliary structure with unimproved land in the remainder.	**North, West, South:** Not depicted, except for freeway to the north **East:** Two dwelling and four associated auxiliary structures The north, east, and south surrounding areas are not depicted.

Sanborn maps did not identify any addresses associated with the Subject Property.

4.6 City Directory Review

City directories have been published since the 1800's and provide detailed occupant information for the Subject Property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the Subject Property.

Historical city directories provided by EDR for the years 1960 to 2020 and reviewed by EFI are listed below.

The EDR City Directory Image Report is provided in Appendix I.

Subject Property

150 Felker Street	
Date	**Listing**
1976	Calendar Melvin, Loma Prieta Regional, Navy Recruiting Station, USA Recruiting Station
1983	CMS Collaborative, Cal Data, Clean Building, End User Software, Jameson Virginia, Newport Rort R M.D., Palmer, Star Med, Weiss Jeffrey Education, Workforce, Zulim David B. Inc.
1992	CMS Collaborative, Clean Building, Gibson Charlie CSLT, Newport Robert R. MD, Pediatrics Inc. Network, Timiran Inc., Workforce
1995	Charlie Gibson Computer Consultant, Clean Building Maintenance Co., David B. Zulim, Robert R. Newport MD, Workforce
2000	Amor Robert H. Church Architect, Clean Building Maintenance Company, CMS Collaborative, Gibson Charlie Computer Consulting, Workforce, Zulim David B. Incorporated
2005	Alvarez Industries, Block Energy Design, Clean Building Maintenance Co., David B. Zulim Inc., Workforce
2010	Block Energy Design, Clean Building Maintenance Co., David B. Zulim Inc., Frank Phanton Architect, Mariposas Art
2014	Bright Green Strategies, Clean Building Maintenance Co., Daves Computer Services, Phanton Frank, Serina M. Rain
2017	Bright Green Strategies, Clean Building Maintenance Co., Serina M. Rain, Zulim David B. Inc.
2020	Clean Building Maintenance Co., Cruzio, Daves Computer SBC, David B. Zulim Inc., David Mays, Envirotects, Thomas Brandon M. DC, Zulim David B. Inc.

Adjoining Properties

Adjoining Property	Years	Property Use	Listings of Concern
North (No associated address)	-	-	-
South (145-155 Felker Street)	1960, 1967, 1971, 1976, 1983, 1987, 1992, 1995, 2000, 2005, 2010, 2014, 2017, 2020	Residential	-
East (136 Felker Street)	1960, 1964, 1987, 2005, 2014, 2020	Residential	-
West (No associated address)	-	-	-

The addresses identified as adjoining and immediately surrounding properties in Section 3.2 were reviewed during the City Directory research and did not reveal any uses of concern.

4.7 Building Department Records Review

The Subject Property address was researched at the City of Santa Cruz Building Department. Items considered in the course of the building permit review are previous Subject Property usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the Subject Property. The following table summarizes relevant building permits obtained and reviewed.

The building permit request and permits reviewed are provided in Appendix J.

Add Address in "Smart Table Actions" drop down > SmartTable Settings		
Date	**Owner/Occupant**	**Purpose**
11/13/1974	Stevens-Calendar	Construct office building (5,600 square feet)
04/18/2012	Agrella Brad and Elsie Trustees	Tenant improvements

The remaining permits obtained and reviewed were for minor tenant improvements, sign permits, or other permits which are not significant and did not contain information about the historical Subject Property use or the potential for RECs.

4.8 Other Historical Sources

In order to further research data gaps, EFI consulted additional resources to further establish the history of the Subject Property. This research may include, but is not limited to: newspapers, miscellaneous maps, books about the history of the area, imagery, land title records, historical societies, interviews, internet searches, and other historical data.

No additional research was conducted during this assessment.

Documentation, if any, is included in Appendix K.

5.0 Records Review and Vapor Encroachment Screen

A radial database search was conducted in accordance with the specifications defined in ASTM E1527-21 which sets the radial search distances for each regulatory database. A copy of the database report is presented in Appendix L of this report.

Following are summaries of the information found for the Subject Property and adjoining and immediately surrounding properties within the relevant database listings and EFI's opinion regarding the potential for the Subject Property to be impacted. Furthermore, EFI considered database listings for surrounding area properties with reported releases.

In addition, EFI herein performed a vapor encroachment screening pursuant to ASTM E2600-22 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (Vapor Encroachment Screening or VES). The results of this VES are incorporated throughout this section.

EFI's opinion is based on the information found in the database listings, through other historical and regulatory resources, the ASTM E2600-15 standard, and assumed groundwater flow direction discussed in Section 2.3.

5.1 Subject Property

Workforce (150 Felker Street, Suite B) - The Subject Property is listed on the Hazardous Waste Tracking System (HWTS) and Facility and Manifest Data (HAZNET) databases. According to the listings, the Subject Property was issued USEPA identification number (ID) CAL000030937 on May 16, 1990 with an inactive date of June 30, 1999. Under which the property generated between 0.05 to 0.23 tons of hazardous waste in the form of other organic solids and aqueous solution with total organic residues 10 percent or more from at least 1990 to 1998. Hazardous waste was disposed of via incineration treatment, landfill disposal, and recycler. Based on the proper disposal, regulatory oversight, and lack of indication of a release, the disposal is not expected to represent a REC.

5.2 Adjoining and Immediately Surrounding Properties

No adjoining/immediately surrounding properties (within 100 feet) were listed on any of the regulatory databases researched.

Agency records reviewed, if any, related to the above listings/summaries are included in Appendix M.

5.3 Surrounding Area

None of the other sites listed on the regulatory database report are considered to pose a significant threat or potential vapor encroachment condition (pVEC) to the Subject Property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross- or down-gradient of the Subject Property and in excess of 1/10 mile from the Subject Property or the critical distance per the VES standard.

Agency records reviewed, if any, related to the above listings/summaries are included in Appendix M.

5.4 Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Three orphan sites were identified in the Radius Map Report prepared for this Subject Property. The sites were manually mapped to determine the location of the site relative to the Subject Property and groundwater gradient.

A cursory review of these listings indicated that none of these sites are associated with the Subject Property or adjoining properties or are otherwise considered to represent a REC to the Subject Property.

6.0 Agency Records and File Reviews

This section summarizes the federal, state, and local agency research conducted for the Subject Property.

6.1 Federal and State Agencies

The Central Coast Regional Water Quality Control Board (CCRWQCB), Department of Toxic Substance Control (DTSC), and Monterey Bay Air Resources District (MBARD) were contacted regarding permits, air emissions, and site investigation files for the Subject Property. Additionally, the SWRCB's GeoTracker, DTSC's EnviroStor and Hazardous Waste Tracking System (HWTS), and USEPA's Envirofacts, MyProperty, and UST Finder online databases were searched for information on the Subject Property to identify any evidence of previous or current hazardous material usage.

- The DTSC HWTS online database records are consistent with those discussed in Section 5.1.
- According to responses to EFI's CCRWQCB and MBARD requests and review of the remaining aforementioned agencies, there are no files for the Subject Property.

Note that the above agency requests were made and the online database searches were conducted on October 10, 2024, with responses received through October 11, 2024.

Requests, responses and records from the above-referenced agencies are included in Appendices N and O.

The California Department of Conservation, Geologic Energy Management Division (CalGEM) online mapping application Well Finder was reviewed for information pertaining to oil and gas exploration on or nearby the Subject Property. In addition, the Pipeline and Hazardous Materials Safety Administration (PHMSA) National Pipeline Mapping System Public Map Viewer was reviewed for information on natural gas and hazardous material pipelines on or nearby the Subject Property.

- No oil wells were identified within 500 feet of the Subject Property.
- A Pacific Gas and Electric Co. gas transmission pipeline is located immediately south of the Subject Property. No incidents were reported along the pipeline. Based on the aforementioned and regulatory oversight, the pipeline is not expected to represent a REC to the Subject Property.

Records of the above can be referenced in Appendix P.

6.2 Local Agencies

The Santa Cruz County Clerk (SCCC) and City of Santa Cruz Fire Department (SCFD) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the Subject Property.

- According to responses to EFI's SCFD requests, there are no files for the Subject Property.
- The SCCC records consisted of building permits which are further discussed in Section 4.7.

Note that the above agency requests were made and the online database searches were conducted on October 10, 2024, with responses received through October 17, 2024.

Requests, responses and records from the above-referenced agencies are included in Appendix Q.

6.3 AGENCY RECORDS RESEARCH LIMITATIONS

At the time this report was issued, no responses has been received from the DTSC. Should relevant information be obtained from this agency subsequent to issuing this report, EFI will prepare and issue an addendum to the Client.

7.0 CONSIDERATIONS BEYOND SCOPE

ASTM International E1527-21 identifies additional conditions which, should they exist at the Subject Property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

This section summarizes the considerations beyond scope evaluated in this assessment.

7.1 ASBESTOS CONTAINING BUILDING MATERIALS

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACMs) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACMs can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

- Based on the age of the on-site structure, there is a potential for asbestos-containing building materials at the Subject Property; however, no testing was completed as part of this report. Suspect ACMs were observed in the form of drop ceiling panels, stucco, and tile flooring and associated mastics. All building materials appeared in good condition at the time of our site reconnaissance. Individual suspect materials would need to be tested as part of an asbestos survey prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos.

Documentation regarding the above, if any, is included in Appendix R.

7.2 LEAD-BASED PAINT

Although the use of lead-based paint (LBP) in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain LBP. Even at low levels, lead poisoning can cause intelligence quotient (IQ) deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity, and other behavioral problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with lead-based paint and from building components coated with LBP that has begun peeling, flaking, and chalking. There is also the potential for soil to have elevated lead levels due to leaching from LBP on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Local, State, and Federal agencies, including the US EPA, Department of Housing and Urban Development (HUD), and Occupational Safety & Health Administration (OSHA), have set various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

- Based on the age of the on-site structure, there is a potential for LBP at the Subject Property. All painted surfaces appeared in good condition at the time of our site reconnaissance. Individual suspect materials would need to be tested as part of a lead-based paint survey prior to any renovation or demolition in order to confirm the presence or non-presence of LBP.

Documentation regarding the above, if any, is included in Appendix R.

7.3 RADON

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

The US EPA has designated three zones depending on radon potential. Zone 1 is an area with the average predicted indoor radon concentration in residential dwellings exceeding the US EPA action limit of 4.0 picoCuries per Liter (pCi/L). Zone 2 are areas with average predicted indoor radon concentration of 2.0 - 4.0 pCi/L and Zone 3 are those areas with an average predicted indoor radon concentration in residential dwellings below 2.0 pCi/L.

- A review of the US EPA Map of Radon Zones places the Subject Property in Zone 2. Site specific radon levels vary greatly within the US EPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the Subject Property. Radon sampling was not conducted during the completion of this assessment.

Documentation regarding the above, if any, is included in Appendix R.

7.4 MICROBIAL GROWTH AND MOISTURE INTRUSION

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present

at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within structures. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in structures, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

EFI observed a limited amount of interior areas of the Subject Property structure in order to identify the significant, visible presence of mold. This activity was not intended to discover all areas which may be affected by mold growth at the Subject Property. Potential areas of mold not observed as part of this limited assessment, include but are not limited to, pipe chases, HVAC systems and within enclosed wall and ceiling cavities that may be present in the Subject Property structure. A complete mold assessment, which may include various types of sampling, would be required to determine if mold levels within the Subject Property structure are at levels acceptable by industry standards.

- EFI did not observe visible or olfactory indications of the presence of mold, nor did EFI observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.

Documentation regarding the above, if any, is included in Appendix R.

7.5 Methane Gas

In response to growing concern regarding methane intrusion into structures and to the potential for methane build-up underneath structures, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a Subject Property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a Subject Property may be necessary.

- Based on EFI's research, the Subject Property is not known to be located in proximity (within 1,000 feet) to any active or abandoned oil wells or landfills. Therefore, the potential for methane risk at the Subject Property is considered low.

Documentation regarding the above, if any, is included in Appendix R.

7.6 Wetlands

According to the Clean Water Act, a wetland is “those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.” Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

According to the United States Fish and Wildlife Service (USFWS) Geospatial Wetlands Information online map, there are no mapped wetlands on the Subject Property. Additionally, no evidence of wetlands, settling ponds, lagoons, surface impoundments, natural catch-basins, or potential wetland features (water marks on tree trunks, drift lines, buttressed roots, etc.) were observed at the Subject Property during this investigation and no evidence of potential water features were noted on the reviewed historical source documents.

Documentation regarding the above, if any, is included in Appendix R.

8.0 FINDINGS AND CONCLUSIONS

EFI has performed a Phase I ESA in conformance with the scope and limitations of ASTM International E1527-21, at 150 Felker Street, Santa Cruz, California, the Subject Property. It is EFI's opinion that no exceptions to or deletions from this practice that would alter the findings of this assessment were identified.

This assessment has revealed no evidence of significant data gaps, RECs, CRECs, or HRECs in connection with the Subject Property.

8.1 SIGNIFICANT DATA GAPS

No significant data gaps were identified during the course of this assessment.

8.2 RECOGNIZED ENVIRONMENTAL CONDITION (REC)

No RECs were identified during the course of this assessment.

8.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITION (CREC)

No CRECs were identified during the course of this assessment.

8.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITION (HREC)

No HRECs were identified during the course of this assessment.

9.0 RECOMMENDATIONS

Based on the foregoing, no additional investigation is recommended at this time.

10.0 SIGNATURES

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared By: Date: November 4, 2024

Salena Johnson
Project Manager

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

PHOTOGRAPHS

Photo 1: View of the Subject Property looking to the northwest.

Photo 2: View of the entrance to the parking lot located on the eastern portion of the Subject Property.

Photo 3: View of stormwater drain located on the southeastern portion of the Subject Property.

Photo 4: View of limited landscaping located on the southern portion of the Subject Property.

Photo 5: View of pedestrian entrance on the southeastern portion of the Subject Property.

Photo 6: View of the western portion of the Subject Property looking to the east.

Photo 7: View of the northern portion of the Subject Property looking to the east.

Photo 8: View of the northwest portion of the Subject Property looking to the southeast.

Photo 9: View of the central portion of the subject structure looking to the west.

Photo 10: View of retail cleaners located in the maintenance room of the subject structure.

Photo 11: View of bathroom located within the subject structure.

Photo 12: View of typical music office located within the subject structure.

Photo 13: View of typical sound equipment stored in the subject structure.

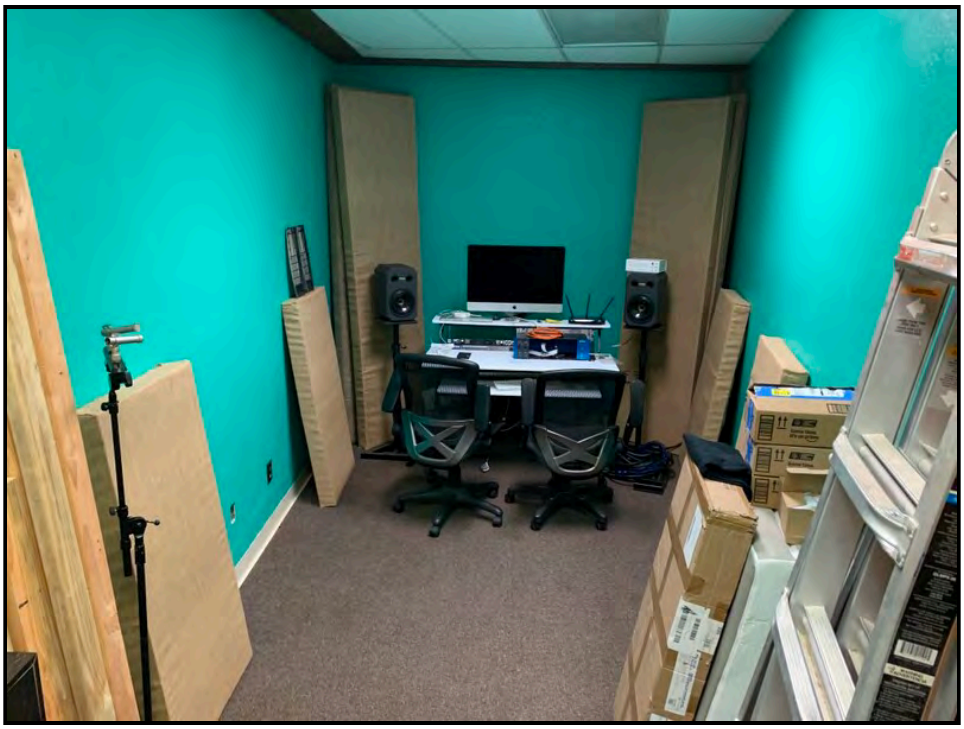

Photo 14: View of typical office set up in the subject structure.

Photo 15: View of common room located within the subject structure.

Photo 16: View of storage room located within the subject structure.

Photo 17: View of water impacted drop ceiling tiles.

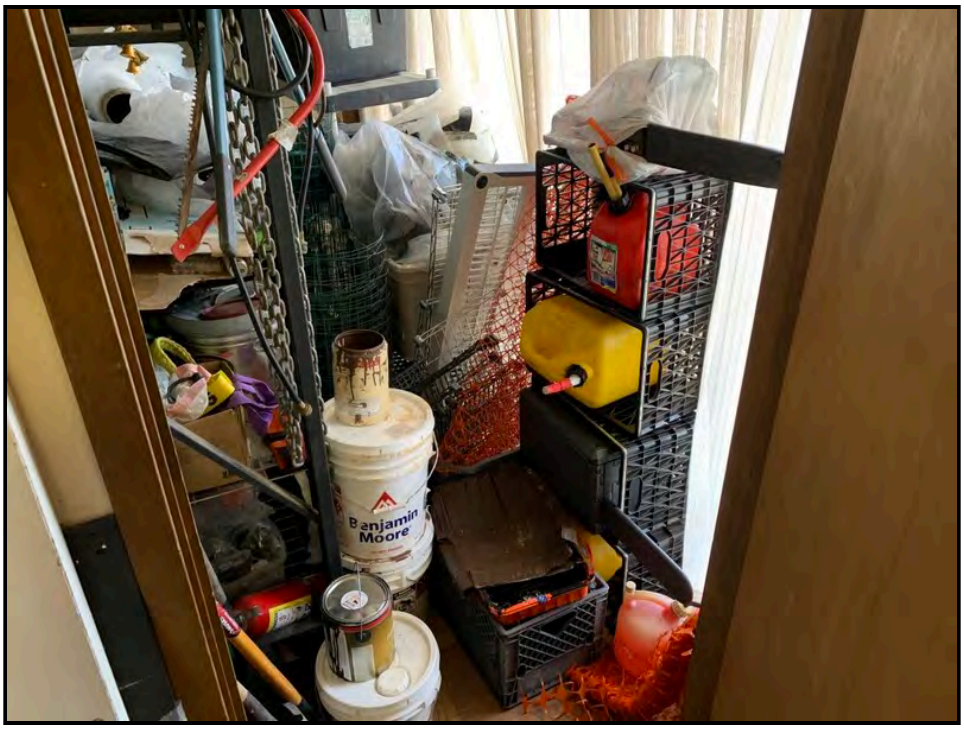

Photo 18: View of limited gasoline and paint containers stored in the storage room.

Photo 19: View of the parking area located on the eastern portion of the Subject Property.

Photo 20: View of the southeastern portion of the Subject Property.

Photo 21: View of propane storage located in the parking area of the Subject Property.

Photo 22: View of the northeastern portion of the subject structure.

Photo 23: View of the southeastern portion of the subject structure.

Photo 24: View of the eastern portion of the Subject Property looking to the south.

Photo 25: View of the entrance to the subject structure looking to the west.

Photo 26: View of the eastern adjoining residential structure.

Photo 27: View of the southern adjoining residential structures.

Photo 28: View of the west adjoining walkway looking to the west.

Photo 29: View of the northern adjoining vacant land and Highway 1.

APPENDIX C

INTERVIEW DOCUMENTATION

USER QUESTIONNAIRE

As part of the All Appropriate Inquiry (AAI) standard for conducting Phase I Environmental Site Assessments set by the Environmental Protection Agency (EPA), the following questions are to be asked of the User.

Please return by e-mail to your project manager or fax listed below.

Please also provide a **Title Report, previous environmental reports including Phase I and Phase II, Site Characterization, Removal or Remediation, Geotechnical Reports, Lead Based Paint or Asbestos Survey or Removal,** or other relevant material, as available**.**

A. GENERAL

1. Subject Property Address 150 Felker St., Santa Cruz, CA 95060

2. Person completing this questionnaire:

Ben Noury	352-200-9419
Name	Telephone Number
Representative of Buyer	10/24/24
Relationship to Property	Date

3. What is your intended use of the property?
☐ No Change ☐ Residential Development ☐ Commercial/Industrial Development

4. What is the purpose of ordering a Phase I ESA?
☐ Purchase ☐ Refinance ☐ Other (please specify) _____

B. AAI STANDARD QUESTIONS

1. Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law?
Yes ☐ No ☐ If Yes, please explain: _____

*NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records shall be searched for environmental liens and AULs.

2. Did a search of land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?
Yes ☐ No ☐ If Yes, please explain: _____

3. Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Yes ☐ No ☐ If Yes, please explain: _____

4. Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? Yes ☐ No ☐ If No, please explain: _____
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property? Yes ☐ No ☐

317 S. Isis Avenue, STE 207, Inglewood, CA 90301
Toll Free: 888-705-6300 Phone: 310-854-6300 Fax: 310-854-0199 Web: https://www.efiglobal.com/our-services/environmental/

5. Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? Yes ☐ No ☐

a. Do you know the past uses of the Subject Property? Yes ☐ No ☐

b. Do you know of specific chemicals that are present or once were present at the Subject Property? Yes ☐ No ☐

c. Do you know of spills or other chemical releases that have taken place at the Subject Property? Yes ☐ No ☐

d. Do you know of any environmental cleanups that have taken place at the Subject Property? Yes ☐ No ☐

If Yes to any of the above, please explain: I believe the property has been used for homeless services most recently. I don't know of other previous uses. Owner intended to redevelop. No known environmental concerns.

6. Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?
Yes ☐ No ☐ If Yes, please explain: _____

317 S. Isis Avenue, STE 207, Inglewood, CA 90301

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by EFI Global Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EFI Global Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

BUILDING PERMITS

Public Records Request Form: Property Related

Complete the form to request property records.

PUBLIC RECORDS REQUEST - Planning/Building Documents	AFFIDAVIT

Response Time: 10 Calendar Days

This form is meant for public records requests for the **Planning and Community Development Department**.

The California Public Records Request Act allows entities **10 calendar days** to make a determination as to whether:

1. responsive records have been identified and when the Planning Department expects to disclose them OR
2. provide a notice of a 14-day extension because further searching for the records is necessary to make such a determination OR
3. inform the requester that no disclosable or responsive records exist

While we attempt to respond and provide records as soon as possible, the 10 calendar days is important in managing the high volume of requests we process on a first-come first-serve basis.

Enter Date of Your Request:

10/10/2024

Description of Request: Please describe the records you are seeking. If applicable, provide the building permit, planning project and/or code case number the records are associated with. Also, if possible, provide a time frame.

Hello,

This firm is performing a Phase I Environmental Site Assessment for the property located at the following addresses:

150 Felker Street, Santa Cruz, CA 95060
APN: 008-181-23

We are requesting any information from your departments pertaining to the following:

• Building permit records, including demolitions, construction, tenant improvements, major sewer installations/removals, and certificates of occupancy on the property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SALZ LEATHERS INC EPA ID:: CAD009182981	1040 RIVER STREET	WNW 1/8 - 1/4 (0.173 mi.)	D42	124

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2024 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 30 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Global ID: T0608700213

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 11 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

Lists of state and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 07/22/2024 has revealed that there are 3 VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 2 HIST Cal-Sites sites within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are

4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that

there are 22 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAL000309933

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/01/2024 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 23 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 11 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 13 CUPA Listings sites within approximately 0.25 miles of the target property.

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 06/06/2024 has revealed that there are 3 Notify 65 sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PG AND E GAS PLANT S	W SIDE N PACIFIC ADJ	S 1/4 - 1/2 (0.431 mi.)	X196	1162

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

RWQCB Region: CENTRAL COAST RWQCB (REGION 3)
Site History: SCCEHS letter dated 9/9/2013 requires consultant to evaluate site relative to LTCP and identify a path toward case closure. SEC, 09/11/2013. Semiannual Monitoring and Sampling. 05/16/2014. In accordance with the SCCEHS approved WP dated 04/01/2014, RP is required to submit a report or reports updating CSM, comparing site with LTCP, describing a soil investigation, describing a downgradient groundwater investigation, describing an investigation of the downgradient vertical distribution of MTBE, describing an investigation of the preferential pathways from the drainage culvert and storm drain, and describing an assessment of the soil vapor to indoor air exposure pathway for off-site residential. New consultant has proposed in their report/work plan dated 10/03/2014 to perform 2nd SA GW Monitoring for 2014, soil investigation, soil-gas investigation, groundwater investigation, surface water investigation, and sensitive receptor survey to update CSM and compare the site to the LTCP. The SCCEHS approved the proposed work in a letter dated 11/21/2014, and specified the project report is due by February 20, 2015.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 07/09/2021. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. [Describe] CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verfiication.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Completed Document Type: Other Report
Completed Date: 11/13/2007
Comments: One of three soil stockpiles generated during utility trenching and pier installation work was resampled. The Santa Cruz County Health Services Agency approved the reuse of the soil stockpile onsite based upon the confirmation sampling results. Reuse of the other two soil stockpiles was approved by DTSC and the Santa Cruz County Health Services Agency on 10/15/2007.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Reports
Completed Date: 08/08/2016
Comments: Five Year Review approved with comments: DTSC agreed with vapor sampling of on-site vapor extraction system before decommissioning, reducing groundwater monitoring frequency from quarterly to semiannually in March and September of each year. DTSC did not consider the site eligible for closure with respect to petroleum hydrocarbon analysis of groundwater due to presence of separate phase petroleum hydrocarbons in monitoring wells. DTSC did not concur with the recommendation to destroy on-site wells due to ongoing

SALZ LEATHERS INC (Continued) **1002850371**

preservation construction on-site, and possible effects of construction activity on groundwater. DTSC requested submittal of a vapor sampling work plan for the vapor extraction system, and a work plan to determine appropriate sampling depths for the new Hydrasleeve(R) groundwater monitoring sampling method. An updated groundwater sampling plan will be prepared after particulars of the groundwater monitoring sampling protocol have been established.

Completed Area Name: PROJECT WIDE

Completed Document Type: Monitoring Report
Completed Date: 11/13/2007
Comments: Levels of total extractable petroleum hydrocarbons increased significantly in wells within the former footprint of the former waste water treatment facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/11/2016
Comments: The report documents four groundwater monitoring events completed in March and July 2014 and January and March 2015. DTSC approved the report with comments to be incorporated into future monitoring reports. The groundwater monitoring results during the four events were generally consistent with historical groundwater monitoring results.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 11/18/2005
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 07/18/2007
Comments: O&M Agreement signed with the City of Santa Cruz Redevelopment Agency (current property owner) that addresses continued groundwater monitoring, operation of a soil vapor extraction system, and cap operation and maintenance activities. A contingency is also included for insitu groundwater treatment if SVE does not reduce VOC concentrations in groundwater underlying the former lacquer shed area.

Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/11/2019
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 05/18/2007
Comments: Report documenting operation of the soil vapor extraction with GAC treatment system. Soil vapor extraction was conducted from the five wells (5 other wells were abandoned as soil excavation expanded into this area) for approximately 8 hours per day for 20-days (from November 22, 2006 through December 21, 2006. The extraction and treatment system was brought onto the site, operated and removed at the end of each day to address vandalism concerns.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/07/2008
Comments: Agreed to modify the sampling protocol for wells impacted by TPH during the second quarter 2008 since the first quarter 2008 sampling had already taken place.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/18/2007
Comments: Report documents the reinstallation of previously abandoned wells and the results of subsequent groundwater and surface water monitoring. LNAPL was detected in a well near the former waste water treatment facility. Groundwater was removed from the well until LNAPL was no longer detected. Additional groundwater monitoring and potential pumping requirements were added to the O&M Plan to address the potential for pile driving in this area to cause the LNAPL layer to again form.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report

SALZ LEATHERS INC (Continued) **1002850371**

Completed Date: 10/15/2007
Comments: Consultant notified DTSC and County on 10/10/2007 regarding sump discovered during pier installation activities. Report contains laboratory results for closure of a concrete sump encountered during site development activities. Closure is being overseen by the Santa Cruz County Health Services Agency staff. Base and sidewall soil samples did not detect total extractable petroleum hydrocarbons above site cleanup goals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/26/2014
Comments: Report submitted to document 1st and 2nd Quarters of 2013: results consistent with historical concentrations. DTSC suggested transition to passive or low-flow groundwater sampling.

Completed Area Name: PROJECT WIDE

Completed Document Type: Five-Year Review Reports
Completed Date: 08/08/2016
Comments: Five Year Review approved with comments: DTSC agreed with vapor sampling of on-site vapor extraction system before decommissioning, reducing groundwater monitoring frequency from quarterly to semiannually in March and September of each year. DTSC did not

SALZ LEATHERS INC (Continued) **1002850371**

consider the site eligible for closure with respect to petroleum hydrocarbon analysis of groundwater due to presence of separate phase petroleum hydrocarbons in monitoring wells. DTSC did not concur with the recommendation to destroy on-site wells due to ongoing preservation construction on-site, and possible effects of construction activity on groundwater. DTSC requested submittal of a vapor sampling work plan for the vapor extraction system, and a work plan to determine appropriate sampling depths for the new Hydrasleeve(R) groundwater monitoring sampling method. An updated groundwater sampling plan will be prepared after particulars of the groundwater monitoring sampling protocol have been established.

Completed Document Type: Remedial Action Completion Report
Completed Date: 05/18/2007
Comments: Report documenting operation of the soil vapor extraction with GAC treatment system. Soil vapor extraction was conducted from the five wells (5 other wells were abandoned as soil excavation expanded into this area) for approximately 8 hours per day for 20-days (from November 22, 2006 through December 21, 2006. The extraction and treatment system was brought onto the site, operated and removed at the end of each day to address vandalism concerns.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/07/2008
Comments: Agreed to modify the sampling protocol for wells impacted by TPH during the second quarter 2008 since the first quarter 2008 sampling had already taken place.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/18/2007
Comments: Report documents the reinstallation of previously abandoned wells and the results of subsequent groundwater and surface water monitoring. LNAPL was detected in a well near the former waste water treatment facility. Groundwater was removed from the well until LNAPL was no longer detected. Additional groundwater monitoring and potential pumping requirements were added to the O&M Plan to address the potential for pile driving in this area to cause the LNAPL layer to again form.

SALZ LEATHERS INC (Continued) **1002850371**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/15/2007
Comments: Consultant notified DTSC and County on 10/10/2007 regarding sump discovered during pier installation activities. Report contains laboratory results for closure of a concrete sump encountered during site development activities. Closure is being overseen by the Santa Cruz County Health Services Agency staff. Base and sidewall soil samples did not detect total extractable petroleum hydrocarbons above site cleanup goals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/26/2014
Comments: Report submitted to document 1st and 2nd Quarters of 2013: results consistent with historical concentrations. DTSC suggested transition to passive or low-flow groundwater sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/26/2014
Comments: Report submitted to document 1st and 2nd Quarters of 2013: results consistent with historical concentrations. DTSC suggested transition to passive or low-flow groundwater sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/01/2009
Comments: Report accepted. Groundwater monitoring continues.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/18/2010
Comments: DTSC approved the 2009 4th quarter groundwater monitoring report but requested changes to their groundwater collection procedures (use of a low flow instead of purging).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/11/2016
Comments: The report documents the first and second semi-annual groundwater monitoring events for 2016. DTSC approved the report with comments to be incorporated into future monitoring reports. The groundwater monitoring results during these two semi-annual events were generally consistent with historical groundwater monitoring events, with variable concentrations of total petroleum hydrocarbons are fuel oil observed in well MW-9R (future results will be monitored).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction

SALZ LEATHERS INC (Continued) **1002850371**

Completed Date:	07/20/2007
Comments:	The Land Use Covenant restricts use of shallow groundwater; requires capping of seven areas totaling approximately 3.1 acres of the 8.3 acre site with a minimum of two feet of clean fill material, asphalt, or concrete; and restricts use of the capped areas. Land Use Covenant also requires non-interference with the groundwater monitoring system and soil vapor extraction system.

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/09/2017
Comments: DTSC oversight cost estimate for fiscal year 2017/2018 (July 1, 2017 - June 30, 2018)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 11/18/2005
Comments: DTSC approved Removal Action Workplan for implementation with one modification in response to comments received. The cleanup goal for hexavalent chromium in the upper five feet of soil was lowered from 30 to 17 mg/kg to be consistent with its California Human Health Screening Level.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

SALZ LEATHERS INC (Continued) **1002850371**

Completed Document Type: Monitoring Report
Completed Date: 08/28/2015
Comments: The Groundwater Monitoring Report, Third and Fourth Quarters 2013 Report presents the results of post remediation groundwater monitoring that was performed in September and December 2013. TCE was detected in groundwater above maximum contaminant levels. Total petroleum hydrocarbons were also detected and separate phase liquid was observed. The monitoring results were consistent with historical data.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Source:	CERS,
Site ID:	165474
Site Name:	7-ELEVEN INC. #38003
Violation Date:	01-26-2023
Citation:	HSC 6.7 25290.1(c)(3),25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3),25290.2(c)(3)
Violation Description:	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003.
Violation Notes:	Returned to compliance on 08/25/2023. Observation: High water levels were observed in all three STP sumps. Correction: Locate leaking section/s of UST system that is allowing groundwater and/or surface water to enter the STP sumps. Make necessary repairs and re-certify failing system/s. Communicate with CUPA Inspector Troy Boone during this process.
Violation Division:	Santa Cruz County Environmental Health
Violation Program:	UST
Violation Source:	CERS,
Site ID:	165474
Site Name:	7-ELEVEN INC. #38003
Violation Date:	01-14-2022
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	Returned to compliance on 02/17/2022. Hazardous waste area was open, unlicked and full of garbage. Drum of hazardous waste was outside of fenced area. Keep the drum in the fenced area, and keep it locked and clean, free of debris. Once you have completed this fill out the return to compliance section at the bottom of this inspection form and send a signed copy in to the EH office in care of Derek Prestesater.

Violation Source:	CERS,
Site ID:	165474
Site Name:	7-ELEVEN INC. #38003
Violation Date:	01-13-2017
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	Returned to compliance on 01/16/2017. OBSERVATION: The weekly Hazardous Waste Inspection log could not be found. The owner or operator shall inspect areas used for container storage or transfer, at least weekly, looking for leaking containers and for deterioration of containers and the containment system caused by corrosion and other factors. CORRECTIVE ACTION: Immediately begin conducting the necessary weekly inspections for all hazardous waste containers at this facility , and maintain access to the log during inspections.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 08/02/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. [Describe] CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verfiication.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	11-13-2018
Citation:	HSC 6.5 25250.19(c) - California Health and Safety Code, Chapter 6.5, Section(s) 25250.19(c)
Violation Description:	"Failure to record in an operating log and retain for three years the following information for each shipment of recycled or exempted oil: 1) The name and address of the used oil recycling facility or generator claiming the oil meets the requirements of HSC 6.5 25250.1. 2) The name and address of the facility receiving the shipment. 3) The quantity of oil delivered. 4) The date of shipment or delivery. 5) A cross-reference to the records and documentation required under HSC 6.5 25250.1."
Violation Notes:	Returned to compliance on 09/16/2022. OBSERVATION: Uniform Hazardous Waste Manifests for returned hazardous products were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for returned hazardous waste products, and submit copies to the CUPA.
Violation Division:	Santa Cruz County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	149084
Site Name:	Ross Dress For Less #0418
Violation Date:	09-17-2014
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly.
Violation Notes:	Returned to compliance on 11/13/2018.
Violation Division:	Santa Cruz County Environmental Health

Citation: 22 CCR 15 66265.176 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.176
Violation Description: Failure to locate reactive and ignitable waste at least 15 meters (50 feet) from the facility's property line.
Violation Notes: Returned to compliance on 11/13/2018. OBSERVATION: As demonstrated by the number and type of hazardous waste violations observed at the time of inspection, personnel are not adequately trained to perform their duties in a way that ensures the facility's compliance with hazardous waste laws and regulations. CORRECTIVE ACTION: Conduct training with applicable personnel and document it according to the requirements of 22 CCR 15 66265.16(d). Submit a copy of the documentation to the CUPA.

Name: AAMCO TRANSMISSION
Address: 1218 OCEAN ST
City,State,Zip: SANTA CRUZ, CA 95060
Site ID: 423823
CERS ID: 10739131
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 423823
Site Name: AAMCO Transmission
Violation Date: 10-01-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 03/02/2022. Label the waste antifreeze container with a properly filled in hazardous waste label.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 423823
Site Name: AAMCO Transmission
Violation Date: 10-15-2018
Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)
Violation Description: Failure to include all required information in the tank system assessment.
Violation Notes: Returned to compliance on 03/02/2022. OBSERVATION: Waste Antifreeze container located in the shop was observed without a hazardous waste label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 423823
Site Name: AAMCO Transmission
Violation Date: 10-01-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 03/02/2022. Business plan submitted on the CERS system has errors on the hazrd classification for Stoddard Solvent. Please delete the old obselete Federal Hazard classes, and add the new Federal Hazard classes on the right side of the inventory form. Then submit the whole package, with any other changes, on the CERS system.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

MIDAS MUFFLER & BRAKES (Continued) **1000157549**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Date:	12-08-2020
Citation:	22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description:	Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes:	Returned to compliance on 01/26/2021.
Violation Division:	Santa Cruz County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	85516
Site Name:	Western Dental
Violation Date:	12-08-2020
Citation:	40 CFR 1 262.34(d)(5)(i) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(i)
Violation Description:	Failure to have at least one employee either on the premises or on call (i.e., available to respond to an emergency by reaching the facility within a short period of time) with the responsibility for coordinating all emergency response measures.
Violation Notes:	Returned to compliance on 01/26/2021. No training records, manifests, or the location of the bulk medical wastes were made available at time of inspection. Partially used painkillers and local anesthesia is discarded with medical wastes. Anesthesia drawer observed to be unlocked when not in use.

Site History:	Residual soil and groundwater contamination may still exist on-site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or de-watering. The Central Coast Water Board, Santa Cruz County Environmental Health Services (SCCEHS), and the appropriate local planning and building departments must be notified prior to any changes in land use, grading activities, excavation, or dewatering. This notification must include a statement that residual soil and groundwater contamination underlie the property and nearby properties. The levels of residual contamination and any associated risks are expected to reduce with time.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
EPA Region: 9
Coordinate Source: Google Map Move
Cuf Case: YES
Quantity Released Gallons: Not reported
Begin Date: 09/29/2000
Leak Reported Date: 09/29/2000
How Discovered: Other Means
How Discovered Description: Not reported
Discharge Source: Other
Discharge Cause: Unknown
Stop Method: Not reported
Stop Description: Not reported
No Further Action Date: 12/05/2012
CA Water Watershed Name: Big Basin - Santa Cruz - San Lorenzo (304.12)
Dwr Groundwater Subbasin Name: West Santa Cruz Terrace (3-026)

BEACH CITY GAS & MINIMART (Continued) **U001601988**

Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	26-30%
CA Enviroscreen 4 Score:	35-40%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	CENTRAL COAST RWQCB (REGION 3)
Site History:	Semiannual Monitoring and Sampling, 4 wells not sampled Residual soil and groundwater contamination may still exist on-site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or de-watering. The Central Coast Water Board, Santa Cruz County Environmental Health Services (SCCEHS), and the appropriate local planning and building departments must be notified prior to any changes in land use, grading activities, excavation, or dewatering. This notification must include a statement that residual soil and groundwater contamination underlie the property and nearby properties. The levels of residual contamination and any associated risks are expected to reduce with time.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History:	Annual Monitoring and Sampling, Residual soil and groundwater contamination may still exist on-site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or de-watering. The Central Coast Water Board, Santa Cruz County Environmental Health Services (SCCEHS), and the appropriate local planning and building departments must be notified prior to any

DEVCO OIL (Continued) **U001601950**

changes in land use, grading activities, excavation, or dewatering. This notification must include a statement that residual soil and groundwater contamination underlie the property and nearby properties. The levels of residual contamination and any associated risks are expected to reduce with time.

TSD EPA ID:	CAD097030993
CA Waste Code:	352 - Other organic solids
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.08
Year:	2017
Gepaid:	CAL000363088
TSD EPA ID:	CAT080013352
CA Waste Code:	343 - Unspecified organic liquid mixture
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.374

Permit Effective Date:	09/15/2015 (OP),
Permit Expiration Date:	09/15/2025 (OP),
Calenviroscreen Score:	31-35%
Total Planned Hours:	Not reported
Total Planned Amount:	Not reported
Total Actual Hours:	0
Quarterly Update:	Quarterly Update Period: January through March 2024 Bayside Oil is currently operating under the permit issued September 15, 2015. This permit expires September 15, 2025. DTSC sent a reminder letter to Bayside on August 23, 2022 and held a pre-application meeting on December 9, 2022. The statutory deadline for submittal of a permit renewal application was September 15, 2023. No permit renewal application has been submitted to date. FACILITY DESCRIPTION/HISTORY Bayside Oil (Facility) is located at 210 Encinal Street, Santa Cruz, California. The Facility is located in an General Industrial area. The Facility is a storage and transfer facility for Used Oil, Waste Antifreeze and Oily Water. Wastes are brought to the facility by tanker trucks or dropped off in small quantities by generators and then pumped into above-ground storage tanks. When sufficient volumes of waste are collected, the waste is transported by tanker truck to an offsite treatment or disposal facility. No treatment of waste is allowed at the Bayside Facility. The Facility has three permitted storage areas. Containment Area #1 has 4 permitted tanks: Tank #1 (12,000 gallons), Tank #2 (8,000 gallons) and Tank #4 (12,000 gallons) store Used Oil. Tank #3 (6,200 gallons) stores Oily Water. Containment Area #2 contains one tank: Tank #7 (10,000 gallons) stores Used Antifreeze. Containment Area #3 contains two tanks: Tank #8 (320 gallons) stores Used Antifreeze and Tank #9 (1000 gallons) stores Used Oil. There are two unused empty tanks (Tank #5 and Tank #6) located in Containment Area #1. These tanks are not permitted by the DTSC. The nearest residential building to the Facility is located across Encinal Street at 232 Encinal Street approximately 60 feet away. PERMITTING REGULATORY DESCRIPTION/HISTORY The Facility was issued a Standardized Hazardous Waste Facility Permit in December 1997 which expired in December 2007. The facility has maintained a DTSC permit continuously since being first permitted. The Facilityis currently effective permit was public noticed between April 20th and June 4th, 2015. Comments were received and DTSC made changes to the draft permit in response to comments. A final permit decision was issued in July 2015.

Comments:	The permit is has an appeal period from June 30, 2015 - July 29, 2015. The final permit will be effective on July 30, 2015. The public comment period was re-issued on July 24, 2015 and will end on September 8, 2015. The radio station failed to run the ad so the public comment period had to be run again. The Final Permit will be effective September 16, 2015. The public may appeal but only for the administrative changes to the permit. The appeal period ends October 16, 2015.

location if approved by the UPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection.

Violation Notes: Observation: Every 30 day DO reports were found to be missing; July 2023, March 2023, etc. Also, Section 5 of DO report not consistently completed; follow-up actions, sign, and date. Correction: Locate and properly file in designated binder all missing DO reports. Also, review DO observations and document follow-up corrections in Section 5 of DO report. Then, sign and date accordingly. Lastly, spill buckets were observed to have water over most of 2023. Make sure the spill buckets are checked and emptied on at least a monthly basis or more frequently.

Violation Division: Santa Cruz County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 106339
Site Name: CITY OF SANTA CRUZ CORPORATION YARD
Violation Date: 04-23-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 09/22/2022. Two tank overfill drop tubes replaced and testes. OK. One tank needs new fitting before they can replace the drop tube.

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/22/2016
Comments: DTSC letter with oversight cost estimate for project activities scheduled for fiscal year 2016/2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 04/01/1986
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 05/07/2012
Comments: Technicial Memo to summarize the results of the pre-design activiteis to obtain additional data to facility the design, planning, and permitting of the final Site remedy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 01/29/2013
Comments: The Workplan proposes six soil gas sampling locations around the perimeter of the building at the 2035 North Pacific Avenue property. The additional soil gas sampling is proposed because an unanticipated timber structure was encountered during remediation and may extend beneath the building. The structure is possibly a feature from the former manufactured gas plant that operated at the Site. The additional soil gas sampling outlined in the Workplan will augment previous data from previous soil gas sampling.

Completed Area Name: PROJECT WIDE

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 12/06/2013
Comments: The Workplan outlines sampling to be performed to evaluate the post-remediation soil gas conditions at the Site. The soil gas sampling data will be incorporated into the post-remediation risk assessment that will be included in the Remedial Action Completion Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/04/2019
Comments: The Report summarizes the results of the groundwater monitoring event that was conducted on November 5 and 6, 2018. Groundwater levels were measured and samples were collected from seven on-site and two

PG&E, SANTA CRUZ MGP (Continued) **S109348530**

off-site monitoring wells. The groundwater monitoring results were generally lower than, or consistent with the results of past groundwater sampling, with the exception of low concentrations of lead detected for the first time in wells MW-2A and MW-4R.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 01/24/2018
Comments: The work notice was distributed to inform the community of the removal of soil gas probes and installation of groundwater monitoring wells for post-remediation operation and maintenance.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/31/2018
Comments: The report summarizes the results of groundwater monitoring performed on March 19 and 20 and May 15, 2018 and was the first semi-annual monitoring event to be conducted since the completion of the remedial action. Groundwater levels were measured and samples were collected from seven on-site and two off-site monitoring wells. The groundwater monitoring results were generally lower than, or consistent with, the results of past groundwater sampling conducted in 2008, 2011, and 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/06/2010
Comments: DTSC sent out an approval letter on April 6, 2010. This RI was conducted at the Santa Cruz former MGP, a 1.3-acre site that now includes four office buildings (with second and third floor residential units above commercial space in one building) and parking areas. The RI scope of work was completed in 2008 to characterize subsurface conditions such that appropriate environmental remediation planning and implementation may be undertaken by PG&E and Chevron. The overall objective was to adequately characterize the nature and extent of impacts so potential health risks and remedial alternatives can be evaluated. Based on the results of soil sampling activities, MGP residues are present in isolated areas generally above the groundwater table, primarily in (1) fill soil (up to 11 feet bgs) in the northeastern portion of the Site along the street-side Site boundary, both north and east of the Kelly Building and (2) shallow fill soil (up to 3.5 feet bgs) on the west and southwest side of the Kelly Building. On the north and east side of the Kelly Building, visible MGP residues including lampblack and tars appear to have been mixed with soil during past grading or redevelopment activities. PAHs, TPH-e, benzene and cyanide are the primary chemicals associated with these impacted soils. In addition, hydrocarbons that appear to represent residual MGP fuel oil are present between approximately 5 and 22 feet bgs in subsurface soil (1) within a narrow isolated area along the street-side Site boundary in the northern-most portion of the Site and (2) in the northern small parking lot of the 2035 North Pacific Avenue property. NAPL was observed in soil samples from both of these areas. TPH-e is the primary chemical associated with these impacted soils. Relatively low concentrations of PAHs and TPH-e were also detected in shallow soils (up to 3 feet bgs) in other limited areas of the Site. With the exception of areas along the adjacent streets and at few locations where access limitations prevented deep soil sampling, the vertical and lateral extent of these constituents has been sufficiently delineated by soil samples with either non-detects or relatively low concentrations. Elevated levels of arsenic are present in shallow fill soil (up to approximately 5 feet bgs) throughout the northern half of the Site. The source of the elevated arsenic in this area is unknown, though may be associated with the use of arsenic-bearing herbicides used to control weeds during or subsequent to the operation of the former MGP. Cadmium was also detected at elevated levels in shallow soil, but appears to be representative of local background conditions. Elevated levels of lead and cyanide were found in buried debris and underlying soil in a limited area in the northern portion of the Site (beneath lumberman s parking lot). The source of the lead and cyanide is unknown. The

PG&E, SANTA CRUZ MGP (Continued) **S109348530**

vertical and lateral extent of arsenic, lead and cyanide has been sufficiently delineated by soil samples with either non-detects or relatively low concentrations with the exception of arsenic, which was not delineated in the adjacent street due to access limitations. Based on the results of soil gas sampling activities, VOCs are present in soil gas at the Site at generally low concentrations. The highest concentrations (benzene and naphthalene) were detected in soil gas samples collected from soils containing MGP lampblack residues, including elevated levels of PAHs and TPH-e, located north and east of the Kelly Building. In this area, MGP residues appear to have been mixed with soils during past grading or redevelopment activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 01/29/2013
Comments: The Workplan proposes six soil gas sampling locations around the perimeter of the building at the 2035 North Pacific Avenue property. The additional soil gas sampling is proposed because an unanticipated timber structure was encountered during remediation and may extend beneath the building. The structure is possibly a feature from the former manufactured gas plant that operated at the Site. The additional soil gas sampling outlined in the Workplan will augment previous data from previous soil gas sampling.

Completed Document Type: Remedial Investigation Report
Completed Date: 04/06/2010
Comments: DTSC sent out an approval letter on April 6, 2010. This RI was conducted at the Santa Cruz former MGP, a 1.3-acre site that now includes four office buildings (with second and third floor residential units above commercial space in one building) and parking areas. The RI scope of work was completed in 2008 to characterize subsurface conditions such that appropriate environmental remediation planning and implementation may be undertaken by PG&E and Chevron. The overall objective was to adequately characterize the nature and extent of impacts so potential health risks and remedial alternatives can be evaluated. Based on the results of soil sampling activities, MGP residues are present in isolated areas generally above the groundwater table, primarily in (1) fill soil (up to 11 feet bgs) in the northeastern portion of the Site along the street-side Site boundary, both north and east of the Kelly Building and (2) shallow fill soil (up to 3.5 feet bgs) on the west and southwest side of the Kelly Building. On the north and east side of the Kelly Building, visible MGP residues including lampblack and tars appear to have been mixed with soil during past grading or redevelopment activities. PAHs, TPH-e, benzene and cyanide are the primary chemicals associated with these impacted soils. In addition, hydrocarbons that appear to represent residual MGP fuel oil are present between approximately 5 and 22 feet bgs in subsurface soil (1) within a narrow isolated area along the street-side Site boundary in the northern-most portion of

PG&E, SANTA CRUZ MGP (Continued) **S109348530**

the Site and (2) in the northern small parking lot of the 2035 North Pacific Avenue property. NAPL was observed in soil samples from both of these areas. TPH-e is the primary chemical associated with these impacted soils. Relatively low concentrations of PAHs and TPH-e were also detected in shallow soils (up to 3 feet bgs) in other limited areas of the Site. With the exception of areas along the adjacent streets and at few locations where access limitations prevented deep soil sampling, the vertical and lateral extent of these constituents has been sufficiently delineated by soil samples with either non-detects or relatively low concentrations. Elevated levels of arsenic are present in shallow fill soil (up to approximately 5 feet bgs) throughout the northern half of the Site. The source of the elevated arsenic in this area is unknown, though may be associated with the use of arsenic-bearing herbicides used to control weeds during or subsequent to the operation of the former MGP. Cadmium was also detected at elevated levels in shallow soil, but appears to be representative of local background conditions. Elevated levels of lead and cyanide were found in buried debris and underlying soil in a limited area in the northern portion of the Site (beneath lumberman s parking lot). The source of the lead and cyanide is unknown. The vertical and lateral extent of arsenic, lead and cyanide has been sufficiently delineated by soil samples with either non-detects or relatively low concentrations with the exception of arsenic, which was not delineated in the adjacent street due to access limitations. Based on the results of soil gas sampling activities, VOCs are present in soil gas at the Site at generally low concentrations. The highest concentrations (benzene and naphthalene) were detected in soil gas samples collected from soils containing MGP lampblack residues, including elevated levels of PAHs and TPH-e, located north and east of the Kelly Building. In this area, MGP residues appear to have been mixed with soils during past grading or redevelopment activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 11/08/2011
Comments: DTSC sent out the 2011 Annual Cost Estimation letter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 02/21/2012
Comments: DTSC determined that implementing the Remedial Action Plan would not have any significant impacts to the environment and signed and filed the final CEQA Negative Declaration. DTSC subsequently filed a Notice of Determination with the State Clearinghouse. Impacts that were evaluated included transportation, air, water, soil, and green house gases.

Background Info:	The approximately 0.8 acre Site is located in downtown Santa Cruz. The Site was an auto wrecking yard from approximately 1946 through the early 1960s. It was then used for storage by a plumbing, heating and ventilation contractor through 1993 and then for woodworking and lumber storage until the Site was remediated. Soil containing PAHs, lead and arsenic above residential cleanup goals was excavated and disposed of offsite at an appropriate landfill.

Site Name:	Ocean Shell
Violation Date:	04-07-2020
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 04/25/2023. The 87-2 tank spill bucket failed its test. Repair or replace and retest the spill bucket until it passes testing.

Citation:	22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description:	Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.
Violation Notes:	Returned to compliance on 04/11/2017. OBSERVATION:No accumulation date on the waste absorbent drum.]. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/12/2009
Comments: DTSC provided notification of its change in project managers and provided an estimate of its oversight costs for fiscal year 2009/2010.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/19/2010
Comments: The annual cost estimation letter was sent out on October 19, 2010 with a cost estimate of $7,924 for oversight cost of a 5-year review and operation and maintenance activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Report
Completed Date: 05/27/2015
Comments: Previous groundwater monitoring at the site involved the sampling of 8 on-site monitoring wells. Six groundwater monitoring wells were decommissioned, either grouted in place or completely removed with the borehole grouted in place. The Monitoring Well Destruction Report documents the decommissioning of the six monitoring wells. The ownership of two groundwater monitoring wells (MW-1R and MW 4R) was transferred to Pacific Gas and Electric, who will incorporate the wells into their monitoring program at the nearby Santa Cruz Manufactured Gas Plant Site. Groundwater monitoring at the River Street Development site was discontinued, with concurrence from DTSC and the California Regional Water Quality Control Board, Central Coast Region.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 09/14/2020

WILSON, GEO INC (Continued) **S101304431**

Comments: Inspection Report approved with the 2017 and 2018 Inspection Reports. Cap in good condition, no disturbance to cap observed. Land use in accordance with Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 02/28/2005
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 02/28/2005
Comments: Environmental Restriction precludes use of the approximately 0.95 acre parcel for sensitive uses, prohibits use of groundwater for purposes other than site remediation or construction dewatering and requires non-interference with the groundwater monitoring system.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 02/28/2005
Comments: Environmental Restriction for 0.03 acre parcel prohibits use of parcel for sensitive uses, restricts groundwater extraction, requires DTSC approval prior to soil movement at or below 15 feet below grade and requires non-interference with the groundwater monitoring system.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 02/28/2005
Comments: Environmental Restriction precludes use of the approximately 0.38 acre parcels for sensitive uses, requires a DTSC-approved Soil Management Plan to disturb soil at or below 15 feet below grade, prohibits use of groundwater for purposes other than site remediation or construction dewatering and requires non-interference with the groundwater monitoring system.

Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/30/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Workplan
Completed Date: 04/05/2013
Comments: Five-Year Review Workplan approved. DTSC provided clarifications in the approval letter. Five-Year Review Report is due April 16, 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Reports
Completed Date: 06/18/2014
Comments: The Central Coast Regional Water Quality Control Board proposed closure of the underground storage tank case at this site, based on the SWRCB Low Threat Underground Storage Tank Case Closure Policy, which would eliminate groundwater monitoring at the site. DTSC concurs with this determination, and thusly would not require future groundwater monitoring. Possibility of elimination of Operation and Maintenance Agreement, if appropriate. Land Use Covenant still in place at site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/15/2014
Comments: The report presents the results of the semi-annual groundwater monitoring events performed in October 2011 and March 2012. The groundwater monitoring results were consistent with historical results. The report included an evaluation using the criteria outlined the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy. The report concluded that the criteria were met and recommended that a case closure summary package be submitted to the Regional Water Quality Control Board (RWQCB) with Department of Toxic Substances Control (DTSC) approval. RWQCB had approved a discontinuation in groundwater monitoring and DTSC noted in its approval letter that it will approve elimination of the requirement for groundwater monitoring upon approval of the Remedial Action Five-Year Review, if deemed appropriate.

Completed Area Name: PROJECT WIDE

WILSON, GEO INC (Continued) **S101304431**

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/19/2010
Comments: The annual cost estimation letter was sent out on October 19, 2010 with a cost estimate of $7,924 for oversight cost of a 5-year review and operation and maintenance activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Report
Completed Date: 05/27/2015
Comments: Previous groundwater monitoring at the site involved the sampling of 8 on-site monitoring wells. Six groundwater monitoring wells were decommissioned, either grouted in place or completely removed with the borehole grouted in place. The Monitoring Well Destruction Report documents the decommissioning of the six monitoring wells. The ownership of two groundwater monitoring wells (MW-1R and MW 4R) was transferred to Pacific Gas and Electric, who will incorporate the wells into their monitoring program at the nearby Santa Cruz Manufactured Gas Plant Site. Groundwater monitoring at the River Street Development site was discontinued, with concurrence from DTSC and the California Regional Water Quality Control Board, Central Coast Region.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Reports
Completed Date: 06/18/2014
Comments: The Central Coast Regional Water Quality Control Board proposed closure of the underground storage tank case at this site, based on the SWRCB Low Threat Underground Storage Tank Case Closure Policy, which would eliminate groundwater monitoring at the site. DTSC concurs with this determination, and thusly would not require future groundwater monitoring. Possibility of elimination of Operation and Maintenance Agreement, if appropriate. Land Use Covenant still in place at site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/15/2014
Comments: The report presents the results of the semi-annual groundwater monitoring events performed in October 2011 and March 2012. The groundwater monitoring results were consistent with historical results. The report included an evaluation using the criteria outlined the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy. The report concluded that the criteria were met and recommended that a case closure summary package be submitted to the Regional Water Quality Control Board (RWQCB) with Department of Toxic Substances Control (DTSC) approval. RWQCB had approved a discontinuation in groundwater monitoring and DTSC noted in its approval letter that it will approve elimination of the requirement for groundwater monitoring upon approval of the Remedial Action Five-Year Review, if deemed appropriate.

Alternate Address:	125 RIVER ST
Alternate City,St,Zip:	SANTA CRUZ, CA 95060
Background Info:	The 1.4 acre Site is made up of nine parcels in downtown Santa Cruz. The Site is capped by pavement or building floors. The buildings are divided into numerous tenant/business spaces and are occupied by retail stores, art co-ops, picture frame storage and assembly shop, bicycle repair shop and lumber yard. Part of the property is underlain by a gasoline plume whose remediation is being overseen by the RWQCB. A manufactured gas plant used to operate across the street from the Site from approximately 1867-1930.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Quarterly Update:	Calif Radiographics Inc (CRI) originally operated under a Standardized Permit and was granted Interim Status on 5/27/1994 to the EPA ID# CAD982482390. CRI receives silver bearing spent photographic solution from customers that they then extract silver sludge from that they send to a precious metal refiner. CRI operated at 375 Coral St, Santa Cruz until their lease was up and they decided to move their facility to 3335 Soquel Dr, Soquel and applied for a new EPA ID# CAL000115947. CRI submitted a Closure Plan for their Santa Cruz location which was approved and operations seemed to continue at their new site though it is unclear whether the Soquel location ever obtained a permit. There is no information about either location after 1995, but SB 2111 came out after that which states silver only sites will no longer be regulated after January 1, 1999. Both facilities will no longer be subject to Hazardous Waste Permit and closure requirements. Therefore, both locations and EPA ID's for CRI are were closed as they are not longer regulated under Hazardous Waste requirements.

Closure:

Site History:	Semiannual Monitoring and Sampling, S-8, S-9, S-17 Not sampled 01/29/2013, Groundwater is cleaned up to the satisfaction of the CCRWQCB according to their letter dated 1/18/13. Lead oversight of case was transferred by the CCRWQCB to SCCEHS accordingly. SCCEHS has no further requirements for soil based on LTCP criteria. SCCEHS

SANTA CRUZ FACILITY (Continued) **S105126372**

recommended in a letter dated 12/21/12 that the RP perform one additional round of soil vapor monitoring to confirm remaining soil-vapor concentrations. Property owner also would like one round of soil vapor monitoring to confirm acceptable vapor concentrations prior to case closure. This is not an active fueling facility. Site is reportedly likely to be redeveloped for combined commercial and residential use. Consultant for RP contacted SCCEHS and indicated they agree that one additional round of soil vapor sampling is appropriate.

RWQCB Region:	CENTRAL COAST RWQCB (REGION 3)
Site History:	Site Background and History The site is located at 125 Dubois Street in Santa Cruz, California. It is a 52,969 square foot parcel developed with a 5,000 square foot warehouse building. Historical industrial uses of the property date back to the 1980s and included a carbide manufacturing plant, machine shop, and lapping shop. Solvents, oils, and petroleum products were stored and used on site in association with these past industrial operations. Environmental investigations conducted in 2023 identified evidence of historical chemical discharges behind the building and to storm drains during past industrial activities. Additionally, a fire occurred on site in 1987 which resulted in discharge of hazardous waste stored in drums. These historical occurrences warranted additional environmental investigation and testing. Environmental Investigation Findings Initial subsurface investigations at the site have detected elevated concentrations of certain chemicals in soil vapor on the property. The primary chemical of concern detected is tetrachloroethylene (PCE), which exceeded environmental screening levels in several soil vapor samples collected beneath the building. PCE is a commonly used industrial solvent. The soil vapor results indicate that past industrial operations involving use of solvents like PCE have impacted subsurface vapor beneath the building. Additional investigation is needed to further define the extent of PCE and other volatile impacts in soil vapor, as well as assess potential impacts to groundwater.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	08/18/2020
Comments:	The Preliminary Endangerment Assessment (PEA) Report was prepared in accordance with the May 5, 2020 PEA Work Plan to evaluate the extent and concentration of contaminants of potential concern (COPCs) including select metals (primarily lead) and polycyclic aromatic hydrocarbons (PAHs) associated with the historic shooting range in the planned farm and garden areas of the Site (approximately 9.5 acres). The Report documents soil sampling procedures and results, includes a human health risk screening evaluation and provides

HOMELESS GARDEN PROJECT - POGONIP FARM (Continued) **S125431927**

recommendations for future remedial actions at the Site. The Report concludes that concentrations of COPCs in soil on portions of the Site exceed screening levels recommended for unrestricted land use. The Report recommends consideration of the following activities to mitigate future risk to human health and the environment at the Site: preparation of a Soil Management Plan; restricting land use in certain areas of the Site; modifying development plans for the Homeless Garden Project to avoid areas where COPC concentrations in soil may pose a risk to human health and the environment; and remediating or implementing institutional controls in areas where COPCs concentrations in soil exceed unrestricted screening levels. -EC 8/18/2020

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	09/05/2019
Comments:	This report was prepared for the City of Santa Cruz prior to DTSC involvement in the project. The Soil Sampling Investigation Report was completed by Environmental Investigation Services, Inc. for the City of Santa Cruz. the investigation consisted of the advancement of 52 shallow soil borings combined into 24 separate 4-point composite soil samples, to assess potential impacts from a former skeet shooting range at the Site. Samples were collected from depths of 0-0.5 feet below ground (fbg) and 1.5-2.0 fbg. Lead was detected at concentrations above 80 mg/kg (DTSC HERO Note 3 Residential Soil Screening Level) in two of the shallow (0-0.5 fbg) composite soil samples, and discreet samples from those locations were subsequently analyzed for lead. The maximum detected lead concentration in soil was 190 mg/kg (from a discrete sample). Polycyclic aromatic hydrocarbons were detected in 11 of 12 shallow composite soil samples, with concentrations above DTSC HERO Note 3 Residential Soil Screening Levels in 4 samples.

Completed Document Type: Operation and Maintenance Report
Completed Date: 09/08/2015
Comments: Not reported

GREYHOUND BUS DEPOT PROPERTY (Continued) **S108748087**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction Monitoring Report
Completed Date:	09/15/2016
Comments:	The report documents an annual inspection that was performed to verify compliance with the restrictions included in the Land Use Covenant that was put in place for the Site, including restrictions on disturbance of the cap and contaminated soil. The Site cap was observed to be in good condition and remains a parking lot for City buses. A few depressions were observed, but had not affected the cap integrity. No evidence of disturbance of the Site cap or contaminated soil was observed.

Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 10/13/2006
Comments: Report prepared prior to DTSC involvement and oversight; prepared under oversight of County of Santa Cruz Environmental Health and RWQCB(Central Coast). Soil contaminated with Polynuclear Aromatic Hydrocarbons (PAHs), Total Petroleum Hydrocarbons as motor oil (TPH-mo), and metals (lead and arsenic). Groundwater does not appear to be impacted by contaminated soils.

Completed Area Name: PROJECT WIDE

GREYHOUND BUS DEPOT PROPERTY (Continued) **S108748087**

Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 01/04/2010
Comments: Full Title: Workplan Addendum to Shallow Soil Vapor Survey - Confirmation Soil & Groundwater Sampling to Address Limited Data Gaps. Four soil sampling locations will be tested to delineate depth of PAH contamination; 3 grab groundwater samples will be collected to determine if metals found in soil have impacted shallow groundwater. Work to be done in conjunction with soil-vapor sampling (scheduled for Jan 5 2010.)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 03/25/2010
Comments: Public Participation Plan finalized March 2010.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/30/2009
Comments: Workplan approved 12/30/2009. Six soil-gas samples to be collect with 6L Summa canisters and sorbent tubes to test for (in particular) naphthalene, cis-1,2-DCE. Fieldwork to begin 01/05/2010; sampling of soil and groundwater detailed in an addendum to this workplan also to be performed. Results to be incorporated into Draft RAP.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 12/31/2009
Comments: Work notice finalized 12/31/2009. Outlines work to be performed January 5 & 6, 2010. Notices hand delivered to community on January 4, 2010.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 05/04/2004
Comments: Report was prepared prior to DTSC oversight. A discolored soil lens was found; appears to contain elevated concentrations of lead, PAHs and TPH. Groundwater sample results indicate the soil lens is not significantly impacting groundwater.

Completed Date: 10/10/2003
Comments: Workplan was prepared prior to DTSC involvment and oversight. Workplan prepared to characterize soil and groundwater at site (follow up to Phase I/II ESA).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 02/25/2011
Comments: Fieldwork implemented as described in RAP and RDIP for 3ft clean cap across entire site; only exception is 88ftx3ft area in northeast corner along northern border- excavation of soils only down to 15 inches bgs in order to preserve foundation stability of building on adjacent parcel to the north.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 11/30/2017
Comments: The Annual Inspection Report (2017) was submitted as required by section 4.05 of the Land Use Covenant to verify compliance with its restrictions and requirements. Additionally, the cap on the Site was checked during the Site inspection that was performed to confirm its integrity. The Site continues to be used as parking lot for buses. The Site fully is covered by an asphalt cap; no maintenance or cap disturbing activities were observed. The Site remains compliant with Land Use Covenant and Operation and Maintenance Agreement.

Completed Area Name: PROJECT WIDE

Completed Document Type: Site Characterization Report
Completed Date: 05/04/2004
Comments: Report was prepared prior to DTSC oversight. A discolored soil lens was found; appears to contain elevated concentrations of lead, PAHs and TPH. Groundwater sample results indicate the soil lens is not significantly impacting groundwater.

Completed Area Name: PROJECT WIDE

Completed Document Type: Design/Implementation Workplan
Completed Date: 01/31/2011
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 10/10/2003
Comments: Workplan was prepared prior to DTSC involvment and oversight. Workplan prepared to characterize soil and groundwater at site (follow up to Phase I/II ESA).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 02/25/2011
Comments: Fieldwork implemented as described in RAP and RDIP for 3ft clean cap across entire site; only exception is 88ftx3ft area in northeast corner along northern border- excavation of soils only down to 15 inches bgs in order to preserve foundation stability of building on adjacent parcel to the north.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 11/30/2017
Comments: The Annual Inspection Report (2017) was submitted as required by section 4.05 of the Land Use Covenant to verify compliance with its restrictions and requirements. Additionally, the cap on the Site was checked during the Site inspection that was performed to confirm its integrity. The Site continues to be used as parking lot for buses. The Site fully is covered by an asphalt cap; no maintenance or cap disturbing activities were observed. The Site remains compliant with Land Use Covenant and Operation and Maintenance Agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 10/09/2020
Comments: Annual Inspection Report indicates cap in good condition, no signs of disturbance. Site use remains consistent with Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 10/09/2020
Comments: Annual Inspection Report indicates cap in good condition, no signs of disturbance. Site use remains consistent with Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/01/2011
Comments: Remedial Action Completion Report finalized 3/1/2011. Remedial Action of creating 3 foot clean cap sitewide performed as detailed in RAP and RDIP, with exception of 88ftx3ft section in NE corner of site, along northern border, which has clean cap of apprx 15 inches. LUC and O&M Agreement signed for the site 3/1/2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 05/12/2014
Comments: The cost estimate includes costs for performing annual cap inspections and Five-Year Reviews for a period of 30-years.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 02/11/2015
Comments: Financial Assurance Cost Estimate approved by Branch Chief. FA Mechanism checked and approved by Financial Responsibility Unit.

Future Area Name: PROJECT WIDE
Future Sub Area Name: Not reported
Future Document Type: Five-Year Review Reports
Future Due Date: 2026

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/27/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/20/2024

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS PROJECT: NORTHEASTERN UNIVERSITY PFAS PROJECT

The PFAS Contamination Site Tracker records qualitative and quantitative data from each site in a chart, specifically examining discovery, contamination levels, government response, litigation, health impacts, media coverage, and community characteristics. All data presented in the chart were extracted from government websites, such as state health departments or the Environmental Protection Agency, and news articles.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Target Property Map:	5602358 SANTA CRUZ, CA
Version Date:	2012
North Map:	5640612 FELTON, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

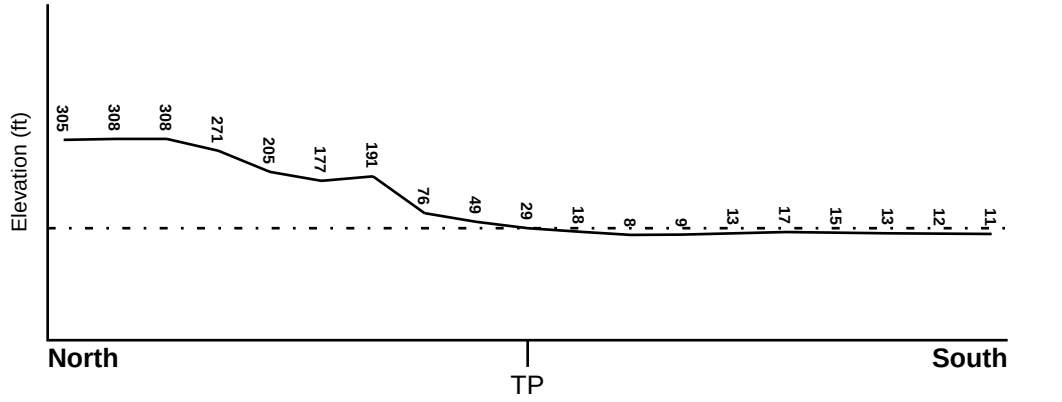
TOPOGRAPHIC INFORMATION

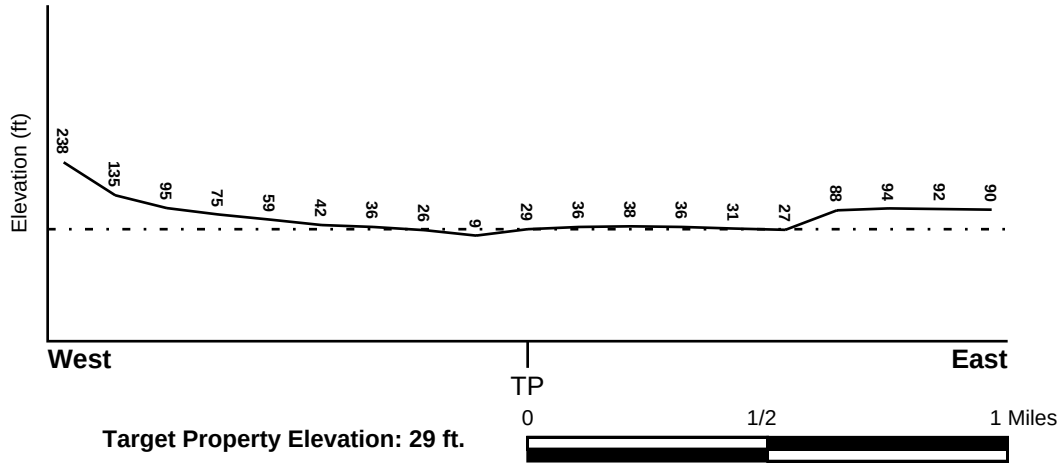
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 29 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06087C0332E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06087C0331E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

SANTA CRUZ	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
K84	1/4 - 1/2 Mile South	N, S
L94	1/4 - 1/2 Mile WNW	W to SE
1G	1/4 - 1/2 Mile WNW	W to SE
2G	1/4 - 1/2 Mile South	N, S

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: WATSONVILLE

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 114 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
2	18 inches	38 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
3	38 inches	62 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: SOQUEL

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

Soil Map ID: 3

Soil Component Name: BAYWOOD

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	16 inches	61 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6

Soil Map ID: 4

Soil Component Name: WATSONVILLE

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 114 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

Hello,

This firm is performing a Phase I Environmental Site Assessment for the property located at the following addresses:

150 Felker Street, Santa Cruz, CA 95060
APN: 008-181-23

We are requesting any information from your departments pertaining to the above property.

Please feel free to contact Salena Johnson with any questions or concerns at 310-425-6087 or Salena.Johnson@efiglobal.com.

Thank you for your assistance with this information.

Best regards,

Laura Daniela Espinosa P.|Environmental Analyst

Hello,

All Central Coast Water Board cleanup cases are located on the GeoTracker Database at http://geotracker.waterboards.ca.gov/. GeoTracker is the Water Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. GeoTracker contains records for sites that require cleanup, such as Leaking Underground Storage Tank (LUST) Sites, Department of Defense Sites, and Cleanup Program Sites. GeoTracker also contains records for various unregulated projects as well as permitted facilities including: Irrigated Lands, Oil and Gas production, operating Permitted USTs, NPDES and Land Disposal Sites.

You can enter any address in the search bar. If there is an open or closed case it will show up on the search. If you find a site on GeoTracker, you can Email the Case Worker for that site for further assistance with your Records Request. Most files have already been uploaded to GeoTracker. If the address does not show a case on GeoTracker then we have no files for that address.

I did a search on the subject site (150 Felker St. Santa Cruz, CA) and the Central Coast Water Board have no paper files or electronic records in GeoTracker. Please check with the local agencies. If you have any questions, let me know. Thank you!

Best,

Naomi Bacop

Public Records Requests

Public Records Request

The City of Santa Cruz understands and supports the public's right to access the public records created and maintained by the City in the course of their normal business. It is the goal of the City to provide service in a transparent manner which includes timely access to records in accordance with the California Public Records Act.

- **Contact Planning to request land use records such as building permits and plans. Complete Online Form**
- **For City Council Agendas, Minutes, and supporting meeting documents please Click Here**
- **To access the Municipal Code, please Click Here**
- **For Vital Records such as birth, death or marriage certificates, please visit the Santa Cruz County Recorder's Office website or call 831-454-2800**

FOR ALL OTHER RECORDS, PLEASE SUBMIT A PUBLIC RECORDS REQUEST BY COMPLETING THE FORM BELOW

CITY OF SANTA CRUZ

PUBLIC RECORDS REQUEST FORM

City Clerk employees respond to public records requests from the public and make every effort to accommodate the requestor. You will be notified in writing within ten (10) calendar days whether your request seeks copies of disclosable public records prepared, owned, used or retained by the City, no records exist, or a 14-day extension is necessary.

Please fill out the form below and refer to the public records request section on the City Clerk's web page for more information related to The California Public Records Act, what are disclosable "Public Records," how to request public records, inspection or collection of records, cost to request records, and what are identifiable public records.
The City has 10 days to respond. After the 10th day, if you have not received an email, please contact City Clerk Bonnie Bush at bbush@cityofsantacruz.com

RESPONSE TO PUBLIC RECORDS ACT REQUEST – CITY CLERK
(CA. Gov't Code §7920.000 et seq.)

Re: PUBLIC RECORDS ACT REQUEST RECEIVED ON Thursday, October 10, 2024

The City of Santa Cruz responds to your public records request for information received on Thursday, October 10, 2024, as indicated below.

Under the California Public Records Act (CPRA) you are entitled to copies of identifiable, non-exempt public records (Govt. Code section 7922.500). Please note that the CPRA requires the City to provide access to, or copies of, records responsive to your request which are in its possession, subject to certain exceptions. The CPRA does not require the City to provide information, answer questions, or create records which do not exist.

Records Requested:
"Phase I Environmental Site Assessment for the property located at the following addresses:

150 Felker Street, Santa Cruz, CA 95060
APN: 008-181-23

We are requesting any information from your departments pertaining to the following:
- *Any reports of the storage, release, or spillage of hazardous materials (HAZMAT), substances, or petroleum products that have ever been located on the property.*
- *Any underground storage tanks (USTs) and aboveground storage tanks (ASTs) on the property.*
- *Industrial wastewater discharge, clarifiers, stormwater, or industrial wastewater, including permits to operate and notices of violation on the property.*
- *Contaminated groundwater or soil records on the property.*
- *Air emissions, including permits to operate, equipment lists, and notices of violation on the property."*

After conducting a reasonable search for requested records, the City Clerk, in consultation with Lee Butler, Planning Director, determined that certain responsive records or portions of responsive records are exempt from disclosure under the CPRA. Specifically, some records are redacted pursuant to the following exemption:

☒ Public Interest Exemption • Gov't Code § 7922.000 • After careful consideration, based on the facts of the particular case and/or the nature of the records requested, we have determined that the public interest in nondisclosure of personal information such as home addresses, telephone numbers, and email

addresses clearly outweighs the public interest served in disclosure of the record(s) in order to protect the privacy or identity of individuals.

Except as stated above, the records responsive to your California Public Records Act request will be available at the following link for 30 days:
https://cityofsantacruz.sharefile.com/public/share/web-s34d11939ab8c440eb928e917548bc3de

Please note: The Fire Department did not have any responsive records for this address.

Please let me know if you have any questions.

Thank you,

Brittany Inclan
Records Coordinator
City of Santa Cruz | City Clerk's Division
809 Center St, Santa Cruz, CA 95060
Phone: 831-420-5034
Email: binclan@santacruzca.gov
Web: www.cityofsantacruz.com

Public Records Requests may be submitted online via the Public Records Request form or by hard copy form available at the City Clerk's Office located at 809 Center Street, Room 8, Santa Cruz, CA 95060.

Please note: Public Record Act Requests submitted via email, fax, USPS, or drop off after 5:00 p.m. on a business day, Saturdays, Sundays, or holidays will be processed as received on the next open business day. The 10-day response period begins when the request is received.

APPENDIX R

CONSIDERATIONS BEYOND SCOPE DOCUMENTATION

CALIFORNIA - EPA Map of Radon Zones

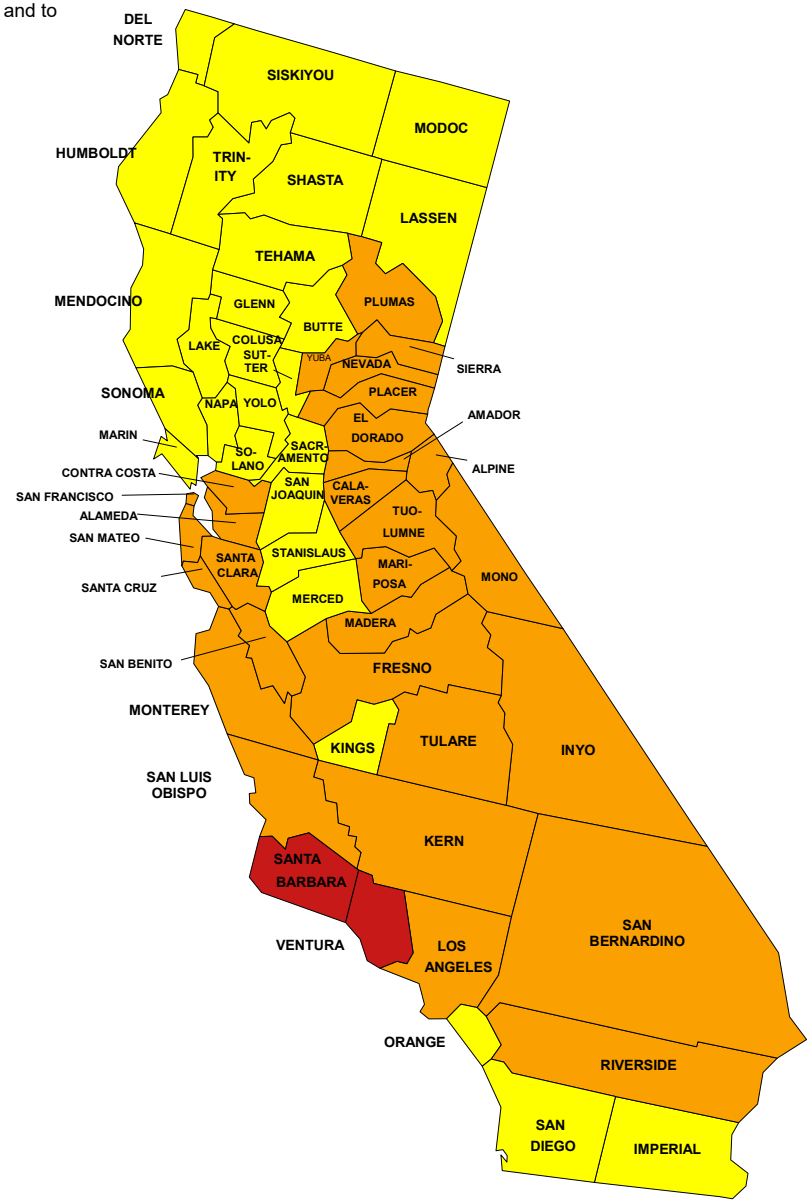
http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of California" (USGS Open-file Report 93-292-I) before using this map. See http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.



Zone 1 Zone 2 Zone 3

Indoor Radon Potential

- Riverine

This map is for general reference only. The US Fish and Wildlife Service is not responsible for the accuracy or currentness of the base data shown on this map. All wetlands related data should be used in accordance with the layer metadata found on the Wetlands Mapper web site.

APPENDIX S

RESUMES

Tyler Derbish| Project Manager

317 South Isis Avenue, Suite 207, Inglewood, California 90301 *310.854.6300*
Tyler.Derbish@efiglobal.com

Professional Summary:

Mr. Derbish is an environmental project manager in EFI's Los Angeles, CA location. He has experience in the environmental due diligence, environmental health and safety, data management, and geographic information systems. Mr. Derbish has provided data management for the Exide Technology clean up. His primary responsibilities are to implement and support environmental field activities for assessment and remediation projects at commercial, industrial and public sector sites. Mr. Derbish is experienced in the performance of Phase I environmental site assessments, environmental compliance/permitting/auditing and EH&S program development.

Mr. Derbish's Areas of Expertise include:

- Phase I Environmental Site Assessment
- Environmental Health and Safety Field Activities
- Geographic Information Systems
- Technical Report Preparation
- SCRIBE Databases
- Access Databases

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations and Emergency Response Certified
OSHA 10-Hour Construction Safety Certification
Asbestos 40-hour Contractor/Supervisor Course
Asbestos Building Inspector Initial Course

Project Roles:

EFI Global Inc., Los Angeles, CA
Environmental Project Manager
As a Project Manager with the Phase One team, duties included communicating with clients, regulatory bodies, and local agencies. Conduct historical research, review of regulatory standards, compare regulatory screening levels, and review of regulatory bodies and historical documents to investigate historical and current uses of properties as part of the Phase I Environmental Site Assessment. In addition, Mr. Derbish operates with the Environmental Health and Safety Department completing Soot Inspections, Asbestos and Lead Sampling, as well as Air Monitoring.

EFI Global Inc., Los Angeles, CA
Environmental Specialist
As part of the Phase One team conducts historical research and works with regulatory bodies to investigate historical and current uses of properties as part of the Phase I Environmental Site Assessment.

©2022 EFI Global, Inc.

EFI Global Inc., Los Angeles, CA
Sampling and Analysis of Properties in the Vicinity of the Exide Facility
As part of the database management team, Mr. Derbish designed and developed databases that tracked sampling activities. Mr. Derbish managed and directed the timely release of SCRIBE and EDD files to the Department of Toxic Substances Control. Mr. Derbish was responsible for coordinating quality control measures and performed quality assurance on all recorded data and data deliverables. Mr. Derbish generated daily route maps on ArcGIS Online for sampling crew and canvassing crew to complete soil testing and obtaining access agreements.

Project Experience:

Phase I Environmental Site Assessment in Camarillo, California

Served as the Project Manager of a Phase I Environmental Site Assessment for a twenty-six-acre property which was previously occupied by 3M Corporation which utilized seventeen Underground Storage Tanks (USTs) contain various chlorinated solvents, gasoline, and other VOCs. The site was an open Envirostor case under direction of DTSC, as well as a CPS-SLIC case from the LARWQCB. EFI Global was able to identify closure for all listings onsite and recommend additional investigation for elevated soil vapor concentrations prior to redevelopment of the property for residential uses.

Dry-Cleaning Projects, Throughout California

Served as the Project Manager for several Phase I Environmental Site Assessments of properties with former and active dry-cleaning operations. Specific challenges included obtaining and reviewing environmental sampling, remediation, and closure proceedings. EFI Global was able to determine if additional investigations were warranted for each site.

Gasoline Service Station Projects, Throughout California

Served as the Project Manager for several Phase I Environmental Site Assessments of gasoline service station properties throughout the state of California. Specific challenges included obtaining and reviewing UST integrity documentation, reviewing environmental sampling, remediation, and closure letters issued for prior UST removals and/or unauthorized releases.

Professional Experience:

EFI Global, Los Angeles, CA, Phase I Project Manager, 2019 - present
EFI Global, Los Angeles, CA, Phase I Environmental Specialist, 2017 – 2019
EFI Global, Los Angeles, CA, Exide Data Manager, 2016-2017
Patton State Hospital, San Bernardino, CA, Student Assistant, 2015-2016
ESRI, Redlands, CA, Health and Human Services Intern, 2015-2015

Education:

Bachelor of Science, Environmental Policy and Management, University of Redlands, CA, 2016
Bachelor of Science, Economics, University of Redlands, CA, 2016

Salena Johnson | Environmental Specialist

317 South Isis Avenue, Suite 207, Inglewood, California 90301 *310.854.6300*
salena.johnson@efiglobal.com

Professional Summary:

Ms. Johnson is an environmental specialist in EFI's Los Angeles, CA location. Her primary responsibilities are to conduct environmental research, request and review historical documentation and produce Phase I ESA reports for projects at commercial, industrial and residential sites. Ms. Johnson is experienced in the performance of Phase I environmental site assessments, data evaluation and technical report preparation, overseeing the drilling of soil borings, collecting soil, soil gas, and groundwater samples as well as monitoring oil excavations for contaminated media. Ms. Johnson has been in the industry since 2020.

Areas of Expertise:

- Phase I Environmental Site Assessments
  - Preparation
  - Data evaluation
  - Identification of potential environmental concerns

Licenses and Certifications:

OSHA 29 CFR 1910.120 40-Hour Safety Training

Project Experience:

Commercial Property with Upgradient Landfill, Riverside County, CA

Preparation of Phase I ESA as part of a commercial property. Previous Phase I ESA revealed historical upgradient landfill. Provided completion of report including site maps indicating wind and groundwater direction with outline of historical upgradient landfill. No further recommendations were necessary based on previous investigations.

Retail Property, Historical Gasoline Station, Fontana, CA

Preparation of Phase I ESA as part of a retail property's real estate due diligence. Historical documentation revealed historical gasoline station onsite. Provided completion of report including site maps outlining location of possible USTs and historical gasoline station. Recommended geophysical survey and subsurface investigation.

Commercial Property, Regional Groundwater Contamination, Costa Mesa, CA

Preparation of Phase I ESA as part of a commercial property's real estate due diligence. Site located within a regional groundwater issue from another source. Provided completion of report including site maps outlining origin of groundwater contamination.

Agricultural Property, Residential Redevelopment, Ventura, CA

Preparation of Phase I ESA as part of a real estate due diligence. Site was used for agricultural purposes with concerns of pesticide contamination. Provided completion of report including site maps outlining location of historical buildings associated with the agricultural purposes. Recommended completing shallow soil samples to test for pesticide contamination.

Brian Brennan, M.Sc., EP | Senior Project Manager | Environmental Services

brian.brennan@efiglobal.com / 760-473-5695

Professional Summary:

Mr. Brennan has over 25 years of environmental consulting experience. Mr. Brennan qualifies as an Environmental Professional with experience that includes preparing, reviewing and managing all aspects of Phase I and II Environmental Site Assessment (ESA) in commercial real estate transactions and large-scale commercial and residential developments following ASTM International E1527-21 and 40 CFR Part 312 (AAI) guidelines. Mr. Brennan has served as a Senior Project Manager and Director of Environmental Services for both government agencies and private clients. Mr. Brennan is familiar with a wide array of investigative techniques and sampling methods including cone penetrometer testing, groundwater sampling and monitoring, geophysical data interpretation, sub-slab and soil vapor probe installation and sampling, indoor air sampling, and asbestos containing materials (ACMs), lead-based paint (LBP) and universal wastes. He also has experience drilling and installing monitoring, extraction, and injection wells using hollow-stem auger, dual tube air percussion, air rotary casing hammer, sonic, and mud-rotary methods. Mr. Brennan has proven skills in planning, managing and executing all phases of small to large scale projects involving soil, soil gas and groundwater investigation and remediation at sites impacted by petroleum hydrocarbons, heavy metals, pesticides, and chlorinated solvents. Mr. Brennan has managed multiple remediation projects that employ soil vapor extraction, total fluids extraction, vertical and horizontal bio-sparging, and light non-aqueous phase liquids removal. Mr. Brennan's technical skills include developing, maintaining and meeting project scope and financial responsibilities; coordinating and managing professional staff and subcontractors; reviewing and evaluating environmental data and risk assessment; preparing and reviewing technical writing documents; and communicating to senior and junior staff, regulatory agencies and clients. Mr. Brennan is an experienced project manager with the ability to oversee professional staff in multiple disciplines and geographic locations; tracking and maintaining schedules, budgets and deliverables; and maintaining current clients, while conducting future business development and marketing.

Areas of Expertise:

Environmental Due Diligence (Phase I/II ESA)

Site Assessment and Remediation/Mitigation

Risk and Data Evaluation

Property Development

Project Management

Third Party Review

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified OSHA

8-Hour HAWOPER Annual Refresher

Environmental Professional, per the CFR Title 40, Chapter I, Subchapter J, Part 312, Subpart C, Section 312.21

California Registered Environmental Assessor II (REA-II) No. 07920

©2018 EFI Global, Inc.

Project Experience:

Single/Multi-Family and Affordable Housing Developers.
Environmental Due Diligence and Site Assessment and Remediation
Mr. Brennan provides Senior Project Manager and Director-level technical oversight on various development and redevelopment projects located throughout the United States that involve Phase I ESA, Phase II ESA, hazardous materials surveys, site characterization, remedial planning, remediation and mitigation, remediation oversight. Projects include master-planned communities, affordable and low income housing and ground up construction projects on previously undeveloped, and/or existing commercial and industrial properties. Services also include client representation in CEQA and NEPA proceedings and public participation proceedings.

Various Lending Institutions.
Environmental Due Diligence and Site Assessment and Remediation
Mr. Brennan provides Senior Project Manager and Director-level technical oversight on various projects located throughout the United States that involve Phase I ESA, Phase II ESA, and hazardous materials surveys for local, regional and national lenders. Projects include adaptive reuse of existing historical or other structures for affordable and low income housing and ground up construction projects on previously undeveloped, commercial and industrial properties.

Government Agencies, Western United States.
Environmental Due Diligence and Site Assessment and Remediation
Mr. Brennan has served as a Senior Project Manager for various local, state, and federal government agencies on projects located in the western United States that have involved environmental due diligence, and site assessment and remediation at Brownfields facilities, commercial and industrial properties, and former military facilities.

Former Norton Air Force Base, Building 468 and Air Command Building, San Bernardino, California.
Site Assessment and Remediation
Mr. Brennan served as a Senior Project Manager during site assessment and remediation of a leaking underground storage tank, asbestos containing piping, and site characterization and demolition of structures associated with the former Norton Air Force Base.

Former Leaking Underground Storage Tank Facility, Imperial, CA.
Site Assessment and Remediation
Mr. Brennan served as Senior Project Manager during site assessment and remediation of a former leaking underground storage tank facility that required remedial soil investigation, groundwater injection treatment, routine compliance monitoring, and the design and implementation of a passive sub-slab soil vapor venting system, which resulted in regulatory agency (Colorado River Basin Water Quality Control Board) case closure.

Former Mr. Best Cleaners, Oceanside, CA.
Environmental Due Diligence and Site Assessment and Remediation
Mr. Brennan served as Senior Project Manager during the preparation of environmental due diligence technical reports. Mr. Brennan also designed and implemented a remedial action plan chlorinated solvent-impacted soil and soil vapor. Remediation activities included remedial excavation, passive sub-slab soil vapor venting system, and human risk assessment for a proposed future sensitive use tenant, which was resulted in regulatory agency (County of San Diego Department of Environmental Health and Quality) case closure.

Court Qualifications/ Depositions:

Superior Court of California, County of Riverside / County of Riverside v. Alvin C. Assink, et al., Case No. RIC 512629, July 16, 2012.
Superior Court of California, County of San Diego / Shirey Falls, LP v. Guadalupe and Evangeline Hernandez, Case No. 37-2014-00006580, October 27, 2015.

Professional Experience:

EFI Global - Environmental Senior Project Manager, 2019-Present
EEI - Director, Environmental Services/Senior Project Manager, 2014-2019
EEI - Senior Project Manager, 2008-2014
EEI - Project Manager, 2004-2008 EEI - Staff Scientist, 2000-2004
United States Department of Interior, Yellowstone National Park, Visitor Use Assistance/Wildland Firefighter/GIS Analyst, 2001
City of San Diego, Parks and Recreation, GIS and Environmental Services, Intern, 1998-2000

Specialized Education:

Geographic Information Systems (GIS), ArcGIS , San Diego State University, 2000
The Groundwater Pollution and Hydrology Course, Princeton Groundwater, Inc., 2003
The Remediation Class, Princeton Groundwater, Inc., 2005
Natural Attenuation, Risk Assessment, and Risk-Based Corrective Action (RBCA) Through Applied Groundwater Modeling, National Groundwater Association (NGWA), 2007
California Environmental Quality Act, University of California, San Diego, 2008

Education:

Master of Science, Environmental Engineering, National University, San Diego, California, 2008
Bachelor of Arts, Geography and Environmental Analysis, San Diego State University, San Diego, California, 2000

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Contamination and Toxic Substances (Multifamily and Non-Residential Properties) – PARTNER

https://www.hudexchange.info/programs/environmental-review/site-contamination

1. **How was site contamination evaluated?** [1] **Select all that apply.**

   ☒ ASTM Phase I ESA
   ☐ ASTM Phase II ESA
   ☐ Remediation or clean-up plan
   ☐ ASTM Vapor Encroachment Screening
   ☐ None of the above

   → *Provide documentation and reports and include an explanation of how site contamination was evaluated in the Worksheet Summary.*
   Continue to Question 2.

2. **Were any on-site or nearby toxic, hazardous, or radioactive substances found that could affect the health and safety of project occupants or conflict with the intended use of the property? (Were any recognized environmental conditions or RECs identified in a Phase I ESA and confirmed in a Phase II ESA?)**

   ☒ No → **Explain below.**

   None

   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

   ☐ Yes → *Describe the findings, including any recognized environmental conditions (RECs), in Worksheet Summary below. Continue to Question 3.*

3. **Can adverse environmental impacts be mitigated?**

[1] HUD regulations at 24 CFR § 58.5(i)(2)(ii) require that the environmental review for multifamily housing with five or more dwelling units or non-residential property include the evaluation of previous uses of the site or other evidence of contamination on or near the site. For acquisition and new construction of multifamily and nonresidential properties HUD strongly advises the review include an ASTM Phase I Environmental Site Assessment (ESA) to meet real estate transaction standards of due diligence and to help ensure compliance with HUD's toxic policy at 24 CFR §58.5(i) and 24 CFR §50.3(i). Also note that some HUD programs require an ASTM Phase I ESA.

☐ Adverse environmental impacts cannot feasibly be mitigated → HUD assistance may not be used for the project at this site. Project cannot proceed at this location.

☐ Yes, adverse environmental impacts can be eliminated through mitigation.
→ *Provide all mitigation requirements*[2] *and documents. Continue to Question 4.*

4. **Describe how compliance was achieved. Include any of the following that apply: State Voluntary Clean-up Program, a No Further Action letter, use of engineering controls**[3]**, or use of institutional controls**[4]**.**
Click here to enter text.

If a remediation plan or clean-up program was necessary, which standard does it follow?
☐ Complete removal
☐ Risk-based corrective action (RBCA)
→ *Continue to the Worksheet Summary.*

Worksheet Summary
Provide a full description of your determination and a synopsis of the information that it was based on, such as:

- Map panel numbers and dates
- Names of all consulted parties and relevant consultation dates
- Names of plans or reports and relevant page numbers
- Any additional requirements specific to your program or region

Include all documentation supporting your findings in your submission to HUD.

The project involves new development for habitation; but is not located within one mile of an NPL ("Superfund") site, within 2,000 feet of a CERCLIS (SEMS) site, nor adjacent to any other known or suspected sites contaminated with toxic chemicals or radioactive materials that are likely to affect the site.

- Per the phase 1 environmental assessment prepared for the project by EFI Global, Inc, "*Suspect ACMs were observed in the form of drop ceiling panels, stucco, and tile flooring and associated mastics… Individual suspect materials would need to be tested as part of an asbestos survey or lead-based paint*

[2] Mitigation requirements include all clean-up actions required by applicable federal, state, tribal, or local law. Additionally, provide, as applicable, the long-term operations and maintenance plan, Remedial Action Work Plan, and other equivalent documents.
[3] Engineering controls are any physical mechanism used to contain or stabilize contamination or ensure the effectiveness of a remedial action. Engineering controls may include, without limitation, caps, covers, dikes, trenches, leachate collection systems, signs, fences, physical access controls, ground water monitoring systems and ground water containment systems including, without limitation, slurry walls and ground water pumping systems.
[4] Institutional controls are mechanisms used to limit human activities at or near a contaminated site, or to ensure the effectiveness of the remedial action over time, when contaminants remain at a site at levels above the applicable remediation standard which would allow for unrestricted use of the property. Institutional controls may include structure, land, and natural resource use restrictions, well restriction areas, classification exception areas, deed notices, and declarations of environmental restrictions.

survey prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos or lead-based paint… This assessment has revealed no evidence of significant data gaps, recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) in connection with the Subject Property… Based on the foregoing, no additional investigation is recommended at this time.

LBP and ACM abatement are required for all commercial demolition projects in California. The developer is conditioned to comply with this Title 24 requirement.

Radon

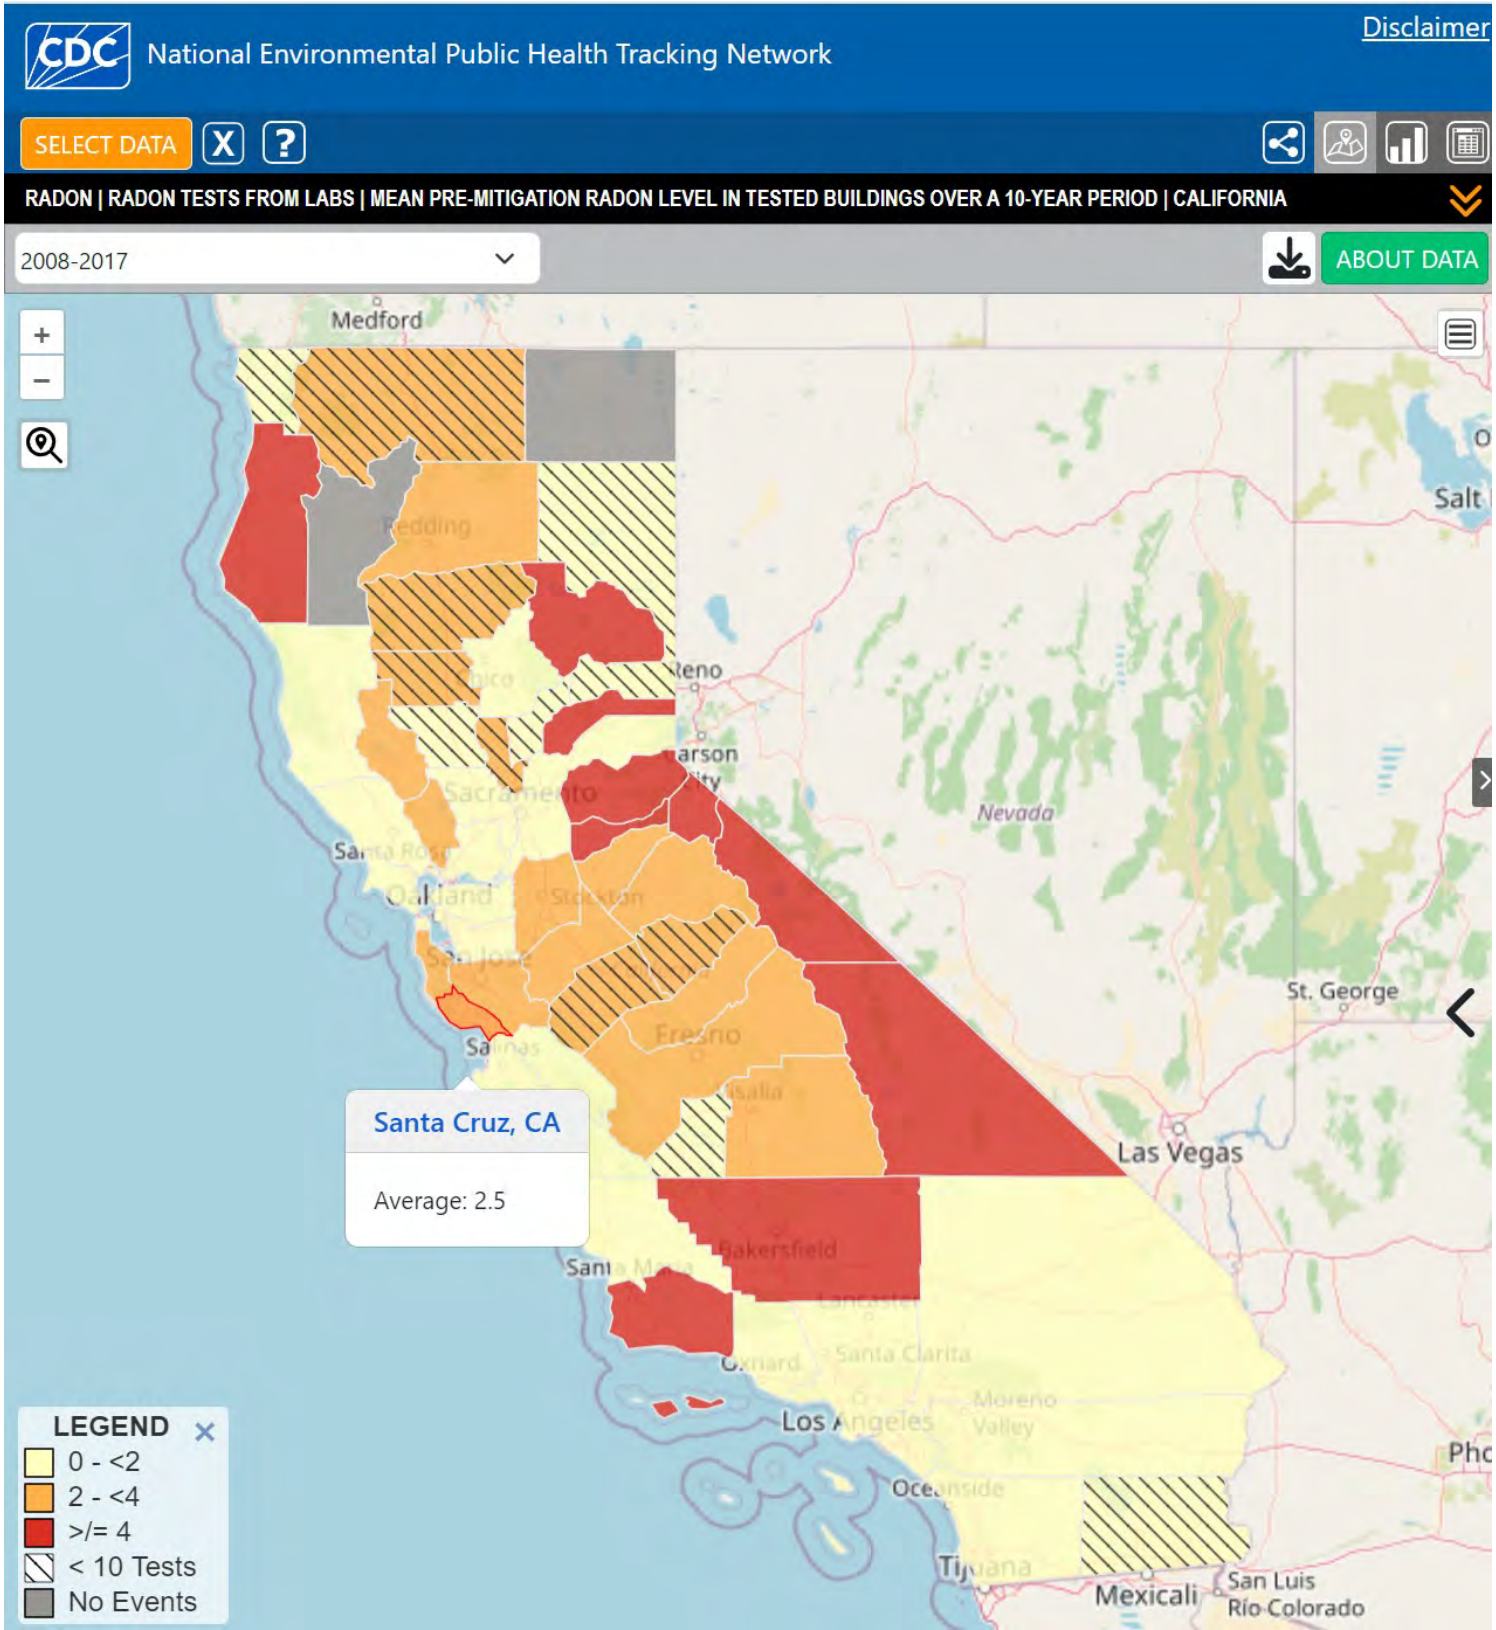
- The CDC National Environmental Public Health Tracking Network has the following data for Butte County. The only data available for California is "Lab" data.

A) Mean pre-mitigation levels in buildings over 10 years equaled 2.5 pCi/L
B) Median pre-mitigation levels in buildings over 10 years equaled 1.2 pCi/L

- The EPA considers levels above 4.0 pCi/L to be concerning. Based on the radon concentration information, it is unlikely that radon abatement activities would be required at the subject property.

- See ***Mitigation Measures and Conditions*** section at the back of the EA.

- See Attach F: Contamination & Toxics Substances



National Environmental Public Health Tracking Network
