1 Executive Summary

Dudek conducted a Phase I Environmental Site Assessment (ESA) for 415 Natural Bridges Drive in Santa Cruz, California 95060 (subject property); see Figure 1, Subject Property Location. The subject property consists of approximately 0.35 acres of land on two contiguous parcels: Assessor's Parcel Number (APN) 003-011-06 (approximately 0.28 acres) and the eastern portion of APN 003-011-10 (approximately 0.09 acres; part of a proposed lot line adjustment).

The findings of this investigation are based on historical sources, information contained in regulatory agency databases, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- The main portion of the subject property had been used for agricultural purposes from at least 1928 to 1931. The lot line adjustment portion of the subject property has been used for agricultural purposes from at least 1928 to the 1990s.
  - Historical and ongoing agricultural use is generally associated with the use of pesticides and herbicides, which can result in elevated concentrations of chlorinated compounds and metals. However, based on redevelopment of both APNs of the subject property, it is unlikely that residual concentrations of pesticide-related compounds would be above applicable risk-based concentrations for the proposed future land use. Therefore, this is not considered a recognized environmental condition (REC).
- The main portion of the subject property currently consists of several large trees and grass, with a fence that separates the main portion from the lot line adjustment portion, which is a paved parking lot.
- Adjoining properties to the main portion of the subject property include residential and commercial land to the north, commercial properties (Toadal Fitness and Housing Authority) to the west, tennis courts and the UC Santa Cruz Genomics building to the south, and commercial properties (U.S. Geological Survey [USGS] Pacific Coastal and Marine Science Center, and various commercial businesses) to the east.
  - Hazardous materials are used and stored at the eastern-adjoining USGS Marine Science Center and various commercial businesses. No evidence of releases or impacts to the subject property were identified associated with these hazardous materials.
- Asbestos-containing materials (2.70 tons) were removed from the subject property when the original residence was demolished. Because the material was removed and properly disposed of, it is unlikely that this has impacted the environmental condition of the subject property.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21) (ASTM 2021). This report summarizes the research and findings of the Phase I ESA. This assessment did not reveal evidence of RECs, historical RECs, controlled RECs, or vapor encroachment conditions (VECs) in connection with the subject property. Data gaps, which were determined not to be significant, are discussed in Section 13, Limitations.

Subject Property Location

Phase I ESA- 415 Natural Bridges Drive

2 Introduction

This Phase I ESA was performed according to the guidelines stipulated in ASTM E1527-21 (ASTM 2021).[1] This Phase I ESA was conducted as part of environmental due diligence for the proposed redevelopment of the subject property.

2.1 Assessment Procedure and Scope of Investigation

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews federal (U.S. Environmental Protection Agency [EPA]), state, county, and local lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consisted of (1) a reconnaissance of the subject property; (2) a search of regulatory agency records; (3) a review of available historical aerial photographs, topographic maps, Sanborn fire insurance maps, city directory listings, and building department records; (4) interviews with the owner of the subject property and user of this report; and (5) preparation of this Phase I ESA report detailing the findings of the investigation.

These activities were conducted to identify RECs. The term *recognized environmental condition* (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release, likely release, past release, or material threat of a future release to the environment.

The term *controlled recognized environmental condition* is an environmental condition that would have been considered a REC in the past but that has been remediated and received risk-based closure by a regulatory agency (i.e., received a "no further action" letter) where residual contamination remains in place. Furthermore, the term *controlled recognized environmental condition* is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls) due to residual on-site contamination.

The term *historical recognized environmental condition* is an environmental condition that would have been considered a REC in the past but that has been remediated and received unrestricted residential use closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

The term *REC* is not intended to include de minimis conditions. De minimis conditions are conditions that generally do not present a material risk of harm to public health or the environment, and thus would not be subject to an enforcement action if brought to the attention of governmental agencies.

[1] ASTM E1527-21 was released on November 17, 2021. The U.S. Environmental Protection Agency (EPA) concurrence with the revised standard will reportedly take up to 1 year. Thus, compliance with AAI to qualify for an exemption from Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability will remain under ASTM E1527-13 until EPA concurs with the new standard. This Phase I ESA meets the requirements of both ASTM E1527-13 and E1527-21.

2.2 Qualifications of Environmental Professionals

This Phase I ESA was prepared by Susan Smith, geologist; Stephanie Chao, environmental engineer; Xiomara Rosenblatt, geologist; and Tyler Young; engineer. Qualifications for Ms. Smith, Ms. Chao, Ms. Rosenblatt, and Mr. Young are included in Appendix A.

I, Susan Smith, declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in Section 312.10 of Title 40 of the Code of Federal Regulations, Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in Title 40 of the Code of Federal Regulations, Part 312.

3 Site Location

The subject property consists of portions of two contiguous parcels of land comprising approximately 0.35 acres in the City of Santa Cruz, Santa Cruz County, California. The subject property is herein referred to as two portions, the main portion and the lot line adjustment portion.

The main portion of the subject property is located at 415 Natural Bridges Drive and is currently an undeveloped grass lot with several large trees. The lot line adjustment portion of the subject property is located on 2931 Mission Street, adjacent to the west of the main portion. The lot line adjustment portion of the subject property is an asphalt, paved parking lot.

The main portion of the subject property is adjoined by the lot line adjustment portion and commercial building to the west, commercial and residential buildings to the north, a commercial building to the west, a commercial/industrial mall to the east, and a railroad and tennis courts to the south. The lot line adjustment portion is adjoined by commercial businesses to the north, residences and the main portion of the subject property to the east, a railroad and tennis courts to the south, and the Moor Creek streambed to the west. The surrounding properties consist of commercial businesses and residential properties.

4 Environmental Setting

4.1 Topography and Geology

The subject property is in the western portion of the City of Santa Cruz, on the south side of U.S. Highway 101 (Cabrillo Highway).

General topographic information for the subject property and the surrounding area was obtained from a review of topographic maps (Appendix B), the Environmental Data Resources (EDR) Radius Map Report (Appendix C), and a site visit. The subject property lies within the marine terrace area of Santa Cruz, consisting of Pleistocene surficial deposits. To the north are the Santa Cruz Mountains and to the east is the Diablo range. The natural topography of the subject property consists of a gentle slope with an overall southern downward gradient. The subject property sits at an average elevation of 72 feet above mean sea level.

No subsurface geologic investigations were performed as part of this Phase I ESA. According to the EDR Radius Map Report (Appendix C), the subject property is underlain by Watsonville silty clay loam soil components. These soils exhibit a wide variety of characteristics and have a clayey texture and very slow infiltration rates.

4.2 Groundwater

According to the EDR Radius Map Report (Appendix C), 72 water wells occur within 1 mile of the subject property. The nearest groundwater monitoring well, located approximately 0.48 miles southeast of the subject property, had a reported water depth of 2.65 feet below ground surface in November 2005. Dudek reviewed the GAMA Groundwater Information System (GAMA 2022) and confirmed that there are no water wells on the subject property. Based on nearby GeoTracker sites and topographic maps, the groundwater flow direction in the vicinity of the subject property is south-southwest.

4.3 Agricultural Use

The subject property is not currently used for agricultural purposes. Historical resources (see Section 8, Site History) indicate that the subject property was used for agricultural purposes on the main portion from the 1920s to the 1940s and on the lot line adjustment portion from the 1920s to the 1990s. No evidence was identified indicating orchards, pesticide storage or mixing, cattle operations or dairies, or other potential sources of elevated concentrations of contaminants of concern typically associated with farming operations.

As with all agricultural properties, pesticides and herbicides were likely used. The chemicals of concern associated with these compounds, such as organochlorinated compounds and metals, are bioaccumulative and persistent in site soils. Therefore, the longer a property is used for agricultural purposes, the more likely there is an accumulation of these chemicals of concern. Although the western portion of the subject property was used for agricultural purposes from the 1920s through the 1990s, it was redeveloped in the 1990s, including grading and excavation for construction of a building and parking lot. Surface soils were likely removed and/or reworked during construction activities; therefore, concentrations of any residual pesticide- and herbicide-related compounds are likely low. Therefore, it is unlikely the historical agricultural use is a REC.

5 Public Agency Records Search

Table 1 summarizes the environmental databases that were searched as required by ASTM E1527-21, and additional environmental databases providing information on hazardous materials and petroleum products on the subject property that were searched. The comprehensive list of databases is included in the EDR Radius Map Report, which was prepared on July 29, 2022 (Appendix C).

Table 1 lists the databases that were searched, search distances from the subject property, whether the subject property was listed, and the number of sites identified. Note that EDR uses the term "target property."

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Subject Property Listed?	Number of Surrounding Sites Listed
NPL	National Priorities List (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL	Sites proposed for NPL	1 mile	No	0
Delisted NPL	NPL Deletions	1 mile	No	0
CERCLIS – Federal Facility	Comprehensive Environmental Response, Compensation, and Liability Information System for the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) with U.S. Environmental Protection Agency Federal Restoration and Reuse Office involvement	0.5 miles	No	0
CERCLIS – SEMS	CERCLA Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP (SEMS ARCHIVE)	No Further Remedial Action Planned – CERCLA SEMS Archive	0.5 miles	No	2
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	0
RCRA TSDF	RCRA – Transportation, Storage, and Disposal Facilities	0.5 miles	No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	0
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	3
RCRA-VSQG	RCRA Very Small Quantity Generators	0.25 miles	No	0
ERNS	Emergency Response Notification System	Target property	No	0
LUCIS	Land Use Control Information System – Institutional Control/Engineering Control	0.5 miles	No	0
US ENG CONTROLS	Federal Sites with Engineering Controls	0.5 miles	No	0
US INST CONTROLS	Federal Sites with Institutional Controls	0.5 miles	No	0

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Subject Property Listed?	Number of Surrounding Sites Listed
RESPONSE	State- and Tribal-Equivalent CERCLIS – Confirmed Release List	1 mile	No	0
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	1
LUST	State Leaking Underground Storage Tank	0.5 miles	No	6
Indian LUST	Tribal LUST	0.5 miles	No	0
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	0
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	1
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0
FEMA UST	Federal Emergency Management Agency (FEMA) owned Registered UST	0.25 miles	No	0
Indian VCP	Voluntary Cleanup on Tribal Land	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup	0.5 miles	No	0
Brownfields	State and Tribal Brownfields	0.5 miles	No	0
EnviroStor	Site Mitigation and Brownfields Reuse Program	1 mile	No	3
CPS-SLIC	Cleanup Program Sites	0.5 miles	No	3
Additional environmental records, including local lists		*Varies*	*Yes*	*51*

Note: The search distances in the EDR Radius Map Report (Appendix C) and listed in this table are equal to or greater than the search distances required by ASTM E1527-21.

5.1 Subject Property

The subject property was identified in two of the databases searched by EDR.

Housing Authority County of Santa Cruz, 415 Natural Bridges Drive. This site is on the main portion of the subject property. The site is listed in the HWTS and HAZNET databases. Both the HWTS and HAWNET listings are associated with the removal and transport of asbestos-containing material. In 2015, 2.07 tons of asbestos-containing material was removed from the subject property and disposed of at a landfill. Because the asbestos-containing material was removed and is inert, it is unlikely that that this listing has adversely impacted the subject property.

5.2 Adjoining Properties

USGS Pacific Coastal and Marine Science Center, 400 Natural Bridges Drive, is on the eastern-adjoining property. The site is listed in the Resource Conservation and Recovery Act (RCRA) NonGen/NLR database; this database includes administrative information about sites that disposed of waste. No additional information was presented in the listing. Based on the administrative nature of the database, it is unlikely that this site has impacted the environmental conditions of the subject property.

5.3 Nearby Properties

WM Wrigley Jr Co and University Business Park, 2801 Mission Street, is approximately 0.1 miles north of the subject property. The site was identified in the SEMS-ARCHIVE, RCRA-SQG, UST, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, NPDES, CIWQS, HWTS, CUPA LISTINGS, HAZNET, and CERS databases. According to information included in the database listings, the site contains an unknown sized carbon steel diesel fuel underground storage tank (UST), and a 10,000-gallon carbon steel diesel UST installed in 1953 and 1977, respectfully. There is no evidence the USTs have been removed from the site. The other listings are related to hazardous waste generators and are not indicative of a release to the environment. Based on the available information, it does not appear that these sites would have impacted the environmental condition of the subject property.

Six leaking underground storage tank cases were identified within 0.50 miles of the subject property. Three sites are downgradient or cross gradient of the subject property and are case closed. Two are up gradient and are case closed. One listing is open and cross gradient to the subject property. Based on available information (discussed in Section 6.3.4, State Water Resources Control Board), these sites do not appear to have impacted the environmental conditions of the subject property.

A total of 25 sites are listed as hazardous waste generators (RCRA VSQG, RCRA NonGen/NLR, CUPA LISTINGS, CERS, CERS HAZWASTE), have hazardous materials stored on site, or are permitted solid waste disposal or recycling centers (HAZNET, HWTS). These listings are administrative in nature and do not necessarily indicate a release of hazardous materials to the environment, and are therefore unlikely to have impacted the environmental conditions of the subject property.

5.4 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the subject property. The EDR Radius Map Report did not identify any unmapped sites (Appendix C).

6 Interviews

6.1 Site Representative Interview

On August 5, 2022, Dudek received the property background information questionnaire for the subject property, completed by the current owner representative, Allan France. A copy of the completed questionnaire is included in Appendix D. Below is the summary of responses to the questionnaire:

- The housing authority has owned the subject property since November 18, 2013. The site has been used as a vacant lot since 2015. The main portion of the subject property was originally developed in 1939 when a residential home was moved onto the lot. The house was demolished in 2015, and the lot has remained vacant since.
- The previous owner's name was the Musitelli Family Trust. No contact information was given.
- The subject property and adjoining properties have not been used for industrial purposes.
- It is unknown if the property was used for agricultural purposes.
- Mr. France was unaware of any previous hazardous materials use, storage, or other activities on the subject property that could indicate a release of hazardous materials or petroleum products.

6.2 User-Provided Information

In accordance with ASTM E1527-21, to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the tasks outlined in Section 6.2 through 6.8 of ASTM E1527-21 must be completed, including a search for environmental liens and activity use limitations. To facilitate this requirement, Dudek sent the following questions to the User of this report. Answers to these questions fulfill the requirement of Sections 6.2 through 6.8 of the ASTM Standard. Allan France, CSI Project Manager, responded on August 2, 2022.

1. **Question:** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

   Response: No.

2. **Question:** Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

   Response: No.

3. **Question:** As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   Response: No.

4. **Question:** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

   Response: No.

5. **Question:** Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? (a) Do you know the past uses of the property, (b) do you know of specific chemicals that are present or once were present at the property, (c) do you know of spills or other chemical releases that have taken place at the property, or (d) do you know of any environmental cleanups that have taken place at the property?

   Response: A geotechnical report was prepared in 2022. (a) Yes. (b) No. (c) No. (d) No.

6. **Question:** As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   Response: No.

6.3 Local Agency Records

6.3.1 City of Santa Cruz

6.3.1.1 Fire Department

Dudek contacted the City of Santa Cruz Fire Department on August 8, 2022, to obtain records about spills or releases, hazardous materials, and building and aboveground storage tank/UST permits related to the subject property. Dudek received a response on August 10, 2022, that no records were found pertaining to the subject property (Appendix E).

6.3.1.2 Building and Safety Department

Dudek accessed the City of Santa Cruz Building and Safety Department's Online Permits and Services database to obtain records about building permits. Permits listed for the eastern portion of the subject property include two residential building permits. The first permit, issued in October 2014, is a building permit for special inspection of the building to see if it can be moved. The second permit, issued in June 2015, is a building permit for demolition. Permits listed for the western portion of the subject property include 11 building permits and three fire permits. The building permits were issued between October 2014 and June 2019, with one permit still under review. The permits are for electrical, mechanical, and plumbing work, as well as interior demolition and remodeling. The permit still under review is a commercial building permit for remodeling. The three fire permits listed were issued between January 2015 and February 2019 for fire sprinkler and alarm systems. Because the western portion of the subject property is not developed, it is likely that the permits are associated with the building located on the remaining portions of the parcel.

6.3.1.3 Zoning and Land Use

Dudek accessed the City of Santa Cruz online Zoning/Land Use/Wildland Urban Interface database for information about zoning of the subject property and surrounding properties (City of Santa Cruz 2022). The western portion of the subject property is zoned as PF for public facility use. The eastern portion of the subject property is zoned RL, which corresponds with low–multiple residential use. The adjoining properties to the north, east, and south are zoned as IGP2, which corresponds with general industrial use, and the adjoining property to the west is zoned as PK, which corresponds with park use. Properties in the surrounding areas are zoned similarly to the subject and adjoining properties, in addition to some areas designated as R-1-5 for single-family residences, and a region to the west zoned as FP for flood plain areas.

6.3.2 Santa Cruz County

6.3.2.1 Department of Public Works

Dudek contacted the County of Santa Cruz Department of Public Works on August 8, 2022, via email and phone call to obtain files relating to any spills or releases, hazardous materials, or building or aboveground storage tank/UST permits pertaining to the subject property. Dudek received a response on August 8, 2022, via email that no records were found pertaining to the subject property because the subject property is within the City of Santa Cruz's jurisdiction, and therefore outside of the County of Santa Cruz enforcement area (Appendix E).

6.3.2.2 Assessor's Office

Zoning information for the subject property was obtained from the County of Santa Cruz Assessor's Office Assessor's Database (County of Santa Cruz 2022a). The western portion of the subject property class is designated as County Building, and the eastern portion of the subject property class is designated as Lot/Residential Zone.

6.3.2.3 Planning Department

Permit application status and history for the subject property was obtained from the County of Santa Cruz Planning Department's online database (County of Santa Cruz 2022b). The search returned no records of building permits pertaining to the subject property.

6.3.2.4 Environmental Health Division

Dudek contacted the County of Santa Cruz Environmental Health Division on August 8, 2022, via email to obtain information about potential spills or releases, hazardous materials and waste, and aboveground or underground storage tanks pertaining to the subject property. Dudek received a response on August 9, 2022, that referred to the County of Santa Cruz's Environmental Health Documents online database for available records and files (Appendix E). Hazardous materials documents, including hazardous materials permits, inspection reports, and more, for the subject property were searched using the County of Santa Cruz's Environmental Health Documents online database (County of Santa Cruz 2022c). The search returned no records pertaining to the subject property.

6.3.3 CalRecycle Solid Waste Information System

Dudek reviewed the California Department of Resources Recycling and Recovery (CalRecycle) Solid Waste Information System online database (CalRecycle 2022). The database has information for all solid waste facilities, operations, and disposal sites in California.

No sites were identified on or adjacent to the subject property. The closest facility or site is more than 1 mile away from the subject property.

6.3.4 State Water Resources Control Board

Dudek searched GeoTracker, the State Water Resources Control Board's data management system, for sites that impact, or have the potential to impact, water quality in California. Records include sites that require cleanup, various unregulated projects, and permitted facilities (SWRCB 2022). Seven sites were identified within 0.5 miles of the subject property. These sites are also identified in the EDR Radius Map Report (Appendix C).

Granite Construction Company is 0.25 miles northwest of the subject property. In 1997, a 10,000-gallon gasoline UST, associated pump, and impacted soil were removed from the site. Low levels of diesel and gasoline were detected below the excavation. The Santa Cruz County Environmental Health Services approved backfilling with non-impacted soil. Further investigation of the site found arsenic-impacted artificial fill and arsenic-impacted groundwater. A total of 82,000 cubic yards of arsenic-impacted fill was removed from the site and a 10-foot clean soil cap was placed above the excavation. An arsenic hot-spot on the Moore Creek bank had 187 cubic yards of impacted soil removed in May 2002. Soil samples from the streambed sediment and surface water samples were collected and indicated no adverse impacts to the creek from the arsenic hot-spot. A June 2022 investigation revealed additional arsenic contamination in the creek. Areas found to have high levels of arsenic were excavated and backfilled with clean soil. The 2005 Quarterly Groundwater and Surface Water Monitoring Report indicated a decrease in dissolved arsenic levels to a low level in groundwater and surface water. Based on the 2005 report, the Regional Water Quality Control Board (RWQCB) granted case closure in May 2005 (SWRCB 2022). Based on the distance to the subject property, the low levels of arsenic currently found in Moore Creek, and the regulatory status of the site, it does not appear that this site would have impacted the environmental condition of the subject property.

Barry Swenson Builder is 0.28 miles west of the subject property. Based on Geotracker (SWRCB 2022), the site contains two USTs, elevated concentrations of arsenic, and may have impacts to soil from chlorinated solvents. In a 2010 investigation, groundwater and soil samples were analyzed for total petroleum hydrocarbons (TPH); benzene, toluene, ethylbenzene, xylenes (BTEX); methyl tertiary butyl ether (MTBE); volatile organic compounds; and metals. No remedial action for soil was conducted after the 2010 investigation. Low levels of TPH (below the Central Coast RWQCB cleanup goal for TPH) cadmium, and nickel were detected in groundwater samples. Based on these results, the site received a no further action from the regulatory agency for groundwater. A work plan was submitted to the regulatory agency in June 2022 for additional soil investigation. This site is open and inactive as of March 2022 (SWRCB 2022). Based on the distance to the subject property, regulatory closure for groundwater, and the current investigation media (soil only), it does not appear that this site would have impacted the environmental condition of the subject property.

Marshall Steel Cleaners and Lipton Inc. is approximately 0.18 miles southeast of the subject property. EDR has listed this as two separate sites, both of which are listed under the same Global ID: T0608700196. According to GeoTracker (SWRCB 2022), a leak of diesel was discovered in April 1988; soil was excavated and free product was removed from groundwater. The groundwater flow direction in the vicinity of this site is toward the south. The site

received closure from the County of Santa Cruz Environmental Health Service on October 21, 1997 (SWRCB 2022). Based on the distance to the subject property, the site being southeast of the subject property with a groundwater flow to the south, and the regulatory status of the site, it does not appear that this site would have impacted the environmental condition of the subject property.

Elyxir Distributing is approximately 0.4 miles northeast of the subject property. This site is listed in LUST, SWEEPS UST, HIST UST, CA FID UST, CORTESE, and CERS databases. A 4,000-gallon UST containing regular motor fuel was installed in an unknown year. A leak was discovered in 1989. Based on closure letters from the County of Santa Cruz Environmental Health Service (1998) and the Central Coast RWQCB, several tanks were removed and hydrocarbons were not detected in the confirmation samples below the tanks; however, benzene, ethylbenzene, txylenes, and toluene were detected in groundwater samples. The Central Coast RWQCB determined there to be a small hydrocarbon release that would not significantly affect groundwater quality, and did not issue additional requirements for this site (SWRCB 2022). Based on the distance to the subject property, the limited impacts to soil, the regulatory status of the site, and the groundwater flow direction (away from the subject property), it does not appear that this site would have impacted the environmental condition of the subject property.

Mission Linen Service is approximately 0.45 miles east of the subject property. Three groundwater monitoring wells were sampled at the site in April 2000; samples were analyzed for total petroleum hydrocarbons, BTEX, and MTBE. Groundwater quality results from this sampling event were found to be below the Central Coast RWQCB water quality objectives for the analytes tested. The Central Coast RWQCB determined the leaking underground storage tank to pose an insignificant threat to groundwater, and required no further action on the site. Two wells were abandoned; in 2001, the County of Santa Cruz requested the third monitoring well be located and also abandoned. The site received closure as of February 2001 (SWRCB 2022). Based on the distance to the subject property, the groundwater flow direction (away from the subject property), the limited impacts to groundwater, and the regulatory status of the site, it does not appear that this site would have impacted the environmental condition of the subject property.

Rudolph Property is approximately 0.48 miles east-northeast of the subject property. Four unknown-sized USTs containing fuel oil and waste oil were removed from the site in 1988. Nine monitoring wells were installed in 1995, and free product and 457,691 gallons of groundwater were removed from these monitoring wells from 1995 to 2015. From 1995 to 2016, approximately 2,000 cubic yards of soil and 12,380 pounds of hydrocarbons in vapor phase were removed from the site. In a 2021 study, the groundwater gradient was determined to be south-southeast of the site. Groundwater quality results from the same study indicated total petroleum hydrocarbons as gasoline (TPHg), benzene, ethylbenzene, xylenes, naphthalene, and volatile organic compounds in the groundwater. The State Water Resources Control Board evaluated the site for low threat closure and qualified under Criterion 2. The Central Coast RWQCB granted case closure in April 2022 (SWRCB 2022). Based on the distance to the subject property, the groundwater flow direction (away from the subject property), and the regulatory status of the site, it does not appear that this site would have impacted the environmental condition of the subject property.

6.3.5 Department of Toxic Substances Control

Dudek searched the EnviroStor database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination (DTSC 2022). The subject property was not identified in the database; however, three sites were identified within 1 mile of the subject property. Dudek reviewed these sites and, based on either distance, impacted media, hydrogeologic location, and/or regulatory case status, none of the sites were likely to have impacted the environmental conditions of the subject property.

6.3.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the California Environmental Protection Agency Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2022). Data sources for the portal include the California Environmental Reporting System, the Department of Toxic Substances Control's EnviroStor, the State Water Resources Control Board's GeoTracker, the California Integrated Water Quality System, and the Federal Toxics Release Inventory.

California Environmental Protection Agency sites are generally administrative in nature, identifying sites that have environmental permits or that handle hazardous materials or generate hazardous waste, but that do not necessarily have an uncontrolled release of hazardous substances to the environment.

No listings were identified for the subject property. Thirteen sites were identified within 0.5 miles of the subject property, two of which adjoin the subject property. The adjoining sites are discussed below.

AT&T Corp.: This site is at 2929 Mission Street, Suite 1, adjoining to the west of the subject property. The site is listed a chemical storage facility. A violation was reported in 2019 for failure to complete a Hazardous Materials Release Response Plan. The site returned to compliance shortly after the violation was issued. Chemicals stored at the site include nickel cadmium batteries and lead acid batteries. Based on the lack of a documented release and the administrative nature of the violation, this site is unlikely to impact the environmental conditions of the subject property.

USGS Pacific Science Center: This site is at 2885 Mission Street, adjoining to the east of the subject property. The site is listed as a chemical storage facility and hazardous waste generator. Four violations were reported for the site. Violations included failure to dispose of chemicals based on accumulation start date or lack of accumulation start date, and failure to submit a Hazardous Materials Release Response Plan. All violations were brought back to compliance shortly after the violation. Chemicals stored at the site include 89 different chemicals related to the marine laboratory. Quantities ranged from 0 to 11 gallons, 0 to 2,599 cubic feet, and 0 to 99 pounds of chemicals. Based on the lack of a documented release, this site is unlikely to impact the environmental conditions of the subject property.

The remaining sites had zero or minor administrative violations that were brought back to compliance shortly after. Based on the lack of a documented release at these sites and the administrative nature of the violations, these sites are unlikely to impact the environmental conditions of the subject property.

6.3.7 California Geologic Energy Management Division

Dudek reviewed the California Geologic Energy Management Division (CalGEM) database on August 17 (CalGEM 2022). One oil and gas well was mapped within 1 mile of the subject property. The well was identified as a plugged dry hole, and is mapped approximately 0.42 miles southeast of the subject property. This information was also verified in the EDR Radius Map Report (Appendix C).

6.3.8 National Pipeline Mapping System

Dudek searched the National Pipeline Mapping System online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under the Department of Transportation Pipeline and Hazardous Material Safety Administration's jurisdiction (DOT 2022).

No pipelines were identified on the subject property. An active natural gas transmission pipeline is adjacent to the south of the subject property. The gas transmission line runs east/west along the railroad south of the subject property, with a 1 block step south, to the southeast of the subject property. No accidents or incidents were found within 1 mile of the subject property.

6.3.9 Agriculture

Dudek contacted the County of Santa Cruz Agricultural Commissioner's Office on August 9, 2022, to obtain information about any historical or current agricultural or pesticide use at the subject property. Dudek received a response on August 10, 2022, that no pesticide use records were found for the subject property (Appendix E).

7 Site Reconnaissance

A site reconnaissance was conducted on August 16, 2022, by Tyler Young of Dudek. The site reconnaissance consisted of walking the subject property, taking notes on observations, and taking photographs. Photographs are presented in Appendix F. Mr. Young was unaccompanied during the site reconnaissance.

7.1 Description of Subject Property and Surroundings

The subject property consists of an approximately 0.33-acre parcel of mixed developed and undeveloped land. Access to the subject property is from Natural Bridges Drive to the east or from the rail line to the south (Photograph 1). The subject property is transected by a barrier (concrete wall) that roughly runs north/south through the property (Photograph 2). The majority of the subject property is east of the barrier.

At the time of the site reconnaissance, the eastern portion of the subject property consisted of mowed annual grassland along with several small brush piles (Photographs 3 through 5). Various species of trees occur throughout the property. The main portion of the subject property is largely flat and gently sloping to the east and south. General trash and debris exist throughout the subject property, likely due to encampments made by marginally housed people in the area (Photograph 6). Walls surround the property to the north and west, and the east and south sides are open. Transmission lines run along Natural Bridges Drive on the east end of the property, and a rail line borders the property to the south.

The western portion of the subject property is a parking lot associated with a gym (Photograph 7). This section is almost entirely impervious surface. There was some evidence present of debris being stored in the southeast section (Photograph 8).

As observed during the site reconnaissance, the subject property is bordered by the following:

- To the north by a residential apartment complex
- To the west by a gym and an associated parking lot
- To the east by a public sidewalk and Natural Bridges Drive
- To the south by an inactive rail line

The main areas of interest noted during the site reconnaissance are described in the following section.

7.2 Summary of Observations

Potable Water Supply or Source

No potable water supply or evidence of water utilities or wells were observed on the subject property.

Sewage Disposal System

No evidence of public sewer systems or septic systems were observed on the subject property.

Wetlands and Natural Waterways

No wetlands or natural waterways were observed on the property.

Surface Water Discharge

The subject property is mainly flat and slopes generally to the east and south. No surface water was present at the time of site reconnaissance.

Distressed Vegetation

No distressed vegetation was observed on the subject property.

Indications of Solid Debris Storage

Some minor solid debris storage and possible evidence of dumping was observed on the subject property (Photographs 8 and 9).

Hazardous Material and Petroleum Product Use and Storage

No hazardous material or petroleum product storage or use was observed on the subject property.

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored pools or flowing water were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

No groundwater wells, cisterns, cesspools, or septic tanks were observed on the subject property.

Polychlorinated Biphenyl–Containing Items

A transformer was observed on the northeast end of the property, but appeared to be in good condition and no staining was observed (Photograph 9). No other evidence of PCB-containing items, such as hydraulic equipment, was observed during the site reconnaissance.

Sumps or Ponds

No sumps or ponds were observed on the subject property.

Abnormal Odor

No abnormal odors were noted on the subject property.

Surface Staining, Corrosion, and Soil Disturbances

No staining or soil disturbances, including de minimis stains, were observed during the site reconnaissance.

Tanks, Drums, Totes, and Intermediate Bulk Containers

No storage tanks, drums, totes, or other bulk containers were observed on the subject property.

Agricultural Use

No evidence of agricultural development was observed.

Off-Site Sources

No potentially hazardous off-site sources were observed adjacent to the subject property.

Fill Material

No evidence of fill material was observed during the site reconnaissance.

Unidentified Substance Containers

No unidentified substance containers were observed on the subject property.

Pipelines

No hazardous material pipelines were observed on the subject property. A review of the National Pipeline Mapping System Public Viewer (DOT 2022) identified a natural gas transmission pipeline immediately south of the rail line along the southern border of the subject property.

8 Site History

Based on a review of the historical aerial photographs, historical topographic maps, agency records, an owner interview, and the city directory report (see appropriate appendices), the main portion of subject property was developed in 1939 and the lot line adjustment portion of the subject property was commercially developed in the 1990s. The main portion of the subject property was used for agriculture from 1928 to 1931, and the lot line adjustment portion was used for agriculture from 1928 to the 1990s. Currently, the main portion of the subject property is vacant land with large trees, and the lot line adjustment portion of the subject property is a paved parking lot associated with the adjoining commercial business.

The first use of the subject property prior to 1928 was not determined, and there are gaps in site history that are greater than 5 years but shorter than 10 years from 1940 to 2005. This constitutes a data failure and is discussed further in Section 13.

The adjoining properties have been used primarily for agricultural purposes from 1928 until the mid-1950, with commercial activity starting on the eastern-adjoining property appearing in 1956. The northern and western adjoining property remained agricultural until the early 2000s, with a commercial building appearing by 2005. The southern adjoining property remained agricultural until the mid-1970s, when the UC Santa Cruz building appeared by 1974. Current uses for the adjoining properties include commercial to the north, west, and east. To the south is the UC Santa Cruz Genomics building and tennis courts. The adjoining properties have listings as RCRA NonGen, chemical storage facilities, and hazardous waste generators. Violations, if any, are administrative in nature and do not indicate a release to the environment.

Surrounding properties were predominately agricultural from 1928 until the mid-1950s, when a transition from agricultural to residential and commercial appeared north, south, and east of the subject property.

8.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1928, 1931, 1940, 1948, 1956, 1968, 1974, 1982, 1993, 2005, 2009, 2012, and 2016 (Appendix G). Dudek also reviewed aerial photographs from Google Earth for 2021 (Google Earth 2022). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 2.

Table 2. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
1928	The subject property appears to be used for agricultural purposes. An east/west-trending railroad (Southern Pacific Railroad) is present parallel to the southern boundary of the subject property.	The adjoining and surrounding properties appear to be agricultural with scattered residences. Moore Creek appears running north/south, east of the subject property. To the southwest, the creek appears to be dammed into a reservoir. North of the subject property, an east/west section of the modern Highway 101 appears.
1931	The main portion of the subject property appears to contain two residences and agricultural land. The lot line adjustment portion of the subject property appears to be	The adjoining property to the north appears to have two small residences within the farmland. Moore Creek, west of the subject property, appears to be a heavily wooded wetland area, north of the reservoir. The remaining adjoining and surrounding properties appear similar to the 1928 aerial photograph.

Table 2. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
	row crops. Natural Bridges Drive appears on the eastern boundary of the main portion of the subject property.	
1940	The subject property appears to be similar to the 1931 aerial photograph.	The surrounding areas appear similar to the 1940 aerial photograph, with the exception of additional residences appearing on surrounding farmlands.
1948	The subject property appears similar to the 1940 aerial photograph.	Additional industrial farming infrastructure appear in the surrounding properties to the east and west.
1956	The subject property appears similar to the 1948 aerial photograph, with the addition of trees on the main portion.	Adjoining to the east, a large commercial building is present. In the surrounding properties, agricultural land appears to be converted into commercial/industrial properties.
1968	The subject property appears similar to the 1956 aerial photograph.	The surrounding properties appear similar to the 1956 aerial photograph, with additional residential housing to the northeast. The adjoining property to the north no longer appears to have residences.
1974	The subject property appears similar to the 1968 aerial photograph.	The adjoining properties to the north, east, and southeast appear to have increased industrial development, with large warehouses appearing and/or expanding, along with the addition of parking lots. The surrounding properties appear to be transitioning from farmland to residential and industrial properties. New residential neighborhoods appear north and south of the subject property.
1982	The subject property appears similar to the 1974 aerial photograph.	A large structure and two large parking lots are observed in the adjoining property to the south. Residential housing appears to be continually expanding north and south of the subject property.
1993	The subject property appears similar to the 1982 aerial photograph.	The adjacent properties and surrounding properties appear similar to the 1982 aerial photograph.
2005	The main portion of the subject property appears similar to the 1993 aerial photograph. The lot line adjustment portion of the subject property appears as a paved parking lot associated with a large commercial building west of the main portion.	Development is observed on the western-adjoining property consisting of what appears to be a large commercial building with associated parking lots. The northern adjoining property appears to have a new multi-unit residential housing complex and associated parking areas. To the west and north, residential homes appear to have expanded into former farmland. To the south, the surrounding properties appear to be continually changing from farmland to commercial buildings.
2009	The subject property appears similar to the 2005 aerial photograph.	The surrounding areas appear similar to the 2005 aerial photograph.
2012	The subject property appears similar to the 2009 aerial photograph.	The surrounding areas appear similar to the 2009 aerial photograph.
2016	Both small residences on the main portion of the subject property are	The surrounding areas appear similar to the 2012 aerial photograph.

Table 2. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
	no longer present. The lot line adjustment portion of the subject property appears to be similar to the 2012 aerial photograph.	
2021	The subject property appears similar to the 2016 aerial photograph.	The surrounding areas appear similar to the 2016 aerial photograph.

Note: See Appendix G for corresponding photographs for 1928 through 2016. The 2021 Google Earth photo is available online and therefore is not included in Appendix G.

8.2 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1954, 1968, 1973, 1981, 1994, 2012, 2015, and 2018 (Appendix B). The topographic maps are a historical source that can be used to document prior uses of the subject property and surrounding area. The topographic maps are described in Table 3.

Table 3. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
1954	The subject property is in the western edge of the City of Santa Cruz. An east/west-trending road (present-day Highway 101) is depicted along the northern boundary of the main portion of the subject property. The Southern Pacific Railroad is depicted running east/west bounding the southern edge of the subject property. Present-day Natural Bridges Drive is depicted trending north/south along the eastern edge of the subject property. The main portion of the subject property is depicted as having one residence. The lot line adjustment portion of the subject property appears undeveloped.	A large structure is depicted on the eastern-adjoining property. A structure is depicted on the northern-adjoining property. Adjoining properties to the west and south are depicted as vacant land. To the west, Moore Creek is depicted trending north/south, terminating into a reservoir southwest of the subject property.
1968	The subject property is similar to its appearance on the 1954 topographic map.	The adjoining properties are similar to their appearance on the 1954 topographic map. The surrounding properties are depicted with more large industrial buildings and residences to the north, east, and south.
1973	The subject property is similar to its appearance on the 1968 topographic map.	The surrounding properties are similar to its appearance on the 1968 topographic map.
1981	The subject property is similar to its appearance on the 1973 topographic map.	The properties adjoining to the east and south are depicted having expanded or new industrial structures. The surrounding areas to the north, east, and south are depicted with an increase of residential homes and commercial/industrial buildings.

Table 3. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
1994	The subject property is similar to its appearance on the 1981 topographic map.	The north/south-trending Natural Bridges Drive is not depicted on the 1994 topographic map. Less residential housing is depicted on the surrounding properties.
2012	The topographic map no longer depicts residences or structures.	The topographic map no longer depicts residences or structures. Generally the surrounding properties are depicted similar to the 1994 topographic map.
2015	The subject property is similar to its appearance on the 2012 topographic map.	The surrounding properties are similar to their appearance on the 2012 topographic map.
2018	The subject property is similar to its appearance on the 2012 topographic map.	The surrounding properties are similar to their appearance on the 2015 topographic map.

Note: See Appendix B for corresponding maps.

8.3 Fire Insurance Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of a subject property and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits. The Sanborn Map Report lists the subject property as an unmapped property; no additional information was included in the report (see Appendix H).

8.4 City Directory

City directory listings were requested from EDR (Appendix I). Table 4 details the findings of the city directory abstract. For the city directory review, Natural Bridges Drive is used to identify the property. Findings for the subject property and for adjoining property addresses are summarized in Table 4.

Table 4. Summary of City Directory Listings

Address	Date	Listings
Subject Property		
415 Natural Bridges Drive	1985–2000	Robert A Musitelli
	1971	Robert A Musitelli
Adjoining to the West		
2929 Mission Street	Addresses were not included as part of the city directory address search performed by EDR. The current uses, based on other records sources, include a commercial building.	
Adjoining to the North		
2929 Mission Street	Addresses were not included as part of the city directory address search performed by EDR. The current uses, based on other records sources, include a multi-tenant residential building.	

Table 4. Summary of City Directory Listings

Address	Date	Listings
Adjoining to the East		
2827 Mission Street	Addresses were not included as part of the city directory address search performed by EDR. The current uses consist of a construction company, gym, bicycle store, real estate agency, and various commercial businesses.	
Adjoining to the South		
2300 Delaware Avenue	Addresses were not included as part of the city directory address search performed by EDR. The current uses are the UC Santa Cruz Genomic Institute and tennis courts.	

8.5 Title Information/Environmental Liens

As discussed in Section 6.2, User-Provided Information, the User is required to complete a search for environmental liens and activity use limitations to satisfy the requirements of the All Appropriate Inquiries Rule for CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) liability protection. An environmental lien search was not requested for this Phase I ESA.

9 Previous Environmental Site Assessments

No previous environmental assessments were provided to Dudek during this Phase I ESA.

10 Vapor Encroachment

Dudek evaluated vapor encroachment to determine whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, site reconnaissance, local regulatory agency responses), as discussed in this report, was also considered. The VEC assessment was conducted in accordance with ASTM E2600-15 guidance (ASTM 2015). The EDR Radius Map Report (Appendix C) was used to evaluate listed contaminated sites as identified in federal, state, and local databases. A VEC assessment report is provided in Appendix J.

No sites were identified as having groundwater contamination or soil vapor contamination that could impact the subject property; as such, no VEC was identified.

11 Non-ASTM Considerations

This section discusses non-ASTM scope considerations that were included in this Phase I ESA based on the conditions at the subject property. These items are not required to be evaluated per the ASTM Standard, but may still pose environmental health and safety risks.

Asbestos

Asbestos has been specifically designated a hazardous substance pursuant to CERCLA Section 102, but abatement costs are generally not recoverable under CERCLA. Many building materials commonly contained asbestos until the late 1970s, and a smaller list of building materials contained asbestos in the 1980s, such as drywall, joint compounds, vinyl flooring, roofing, asbestos-cement products, and stucco. Under the Toxic Substances Control Act, the EPA banned the use of asbestos in many products, with partial bans occurring in 1989 and 1993. However, a full ban of asbestos products did not occur until 2019. Therefore, if a building was constructed prior to 1989, it likely contains asbestos. If it was constructed between 1989 and 2019, it is less likely asbestos is present, but there is still a chance that asbestos was used.

Based on the EDR Radius Map Report, 2.07 tons of asbestos-contaminated material was removed from the subject property in 2015 (Appendix C). Because the materials have been removed and properly disposed of, it is unlikely they have impacted the environmental conditions of the subject property.

Lead-Based Paint

Paint manufacturers frequently used lead as a primary paint ingredient through the 1940s, and gradually decreased its use in the 1950s and 1960s. The federal Department of Housing and Urban Development (HUD) estimates 30% of homes built in the United States before 1978 contain some lead-based paint. The Consumer Product Safety Commission prohibited the use of lead-based paints in residential buildings in 1978; however, the use of lead-based paints in commercial and industrial buildings is not prohibited.

The subject property had a residence built in 1939 and demolished in 2015. All demolished material was removed off site in 2015. Since the materials have been removed, it is unlikely they have or currently impact the environmental conditions of the subject property.

Radon

Radon is a radioactive gas that is produced from the natural decay of uranium, radium, and thorium in soil, rock, and groundwater. When radon becomes trapped in buildings and concentrations accumulate, exposure to radon can be a concern.

The EDR Radius Map Report presents radon test results for the vicinity of the subject property (Appendix C). Two sites within Santa Cruz County were evaluated. The radon concentration at these sites averaged 4.80 picocuries per liter (pCi/L) in the living area. The EPA radon zone for Santa Cruz County is 2, which corresponds with average expected indoor radon levels between 2 and 4 pCi/L. The federal radon action level is 4 pCi/L.

12 Findings and Conclusions

Information gathered for this report indicated the following:

- The main portion of the subject property has been used for agricultural purposes from at least 1928 to 1931. The lot line adjustment portion of the subject property has been used for agricultural purposes from at least 1928 to the 1990s.
  - Historical and ongoing agricultural use is generally associated with the use of pesticides and herbicides, which can result in elevated concentrations of chlorinated compounds and metals. However, based on redevelopment of both APNs of the subject property, it is unlikely that residual concentrations of pesticide-related compounds would be above applicable risk-based concentrations for the proposed future land use. Therefore, this is not considered a REC.
- The main portion of the subject property currently consists of several large trees and grass, with a fence that separates the main portion from the lot line adjustment portion, which is a paved parking lot.
- Adjoining properties to the main portion of the subject property include residential and commercial land to the north, commercial properties (Toadal Fitness and Housing Authority) to the west, tennis courts and UC Santa Cruz Genomics building south, and commercial properties (USGS Pacific Coastal and Marine Science Center, and various commercial businesses) to the east.
  - Hazardous materials are used and stored at the eastern-adjoining USGS Marine Science Center and various commercial businesses. No evidence of releases or impacts to the subject property were identified associated with these hazardous materials.
- Asbestos-containing materials (2.70 tons) were removed from the subject property when the original residence was demolished. Since the material was removed and properly disposed of, it is unlikely that this has impacted the environmental condition of the subject property.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21) (ASTM 2021). This report summarizes the research and findings of the Phase I ESA. This assessment did not reveal evidence of RECs, historical RECs, controlled RECs, or VECs in connection with the subject property. Data gaps, which were determined not to be significant, are discussed in Section 13, Limitations.

13 Limitations

13.1 Data Gaps and Data Failures

As defined in ASTM E1527-21 (ASTM 2021), a data failure is a failure to achieve the historical research objective required by the ASTM Standard even after reviewing the standard historical resources that are reasonably ascertainable and likely to be useful. A data failure is a type of data gap.

The following data failures were identified for this Phase I ESA:

- Gaps greater than the 5-year interval required by the ASTM standard were identified in historical resources. This constitutes a data failure. Although this is a data failure, based on the site history, available historical and regulatory information, and present-day use, Dudek has determined that this data failure is not a data gap. The first use of the subject property (prior to 1928) could not be determined based on available historical records. This constitutes a data failure.

As defined in ASTM E1527-21, a data gap is the lack of or inability to obtain information required by this practice despite good faith efforts. A data gap is considered significant when it affects the ability of the environmental professional to identify recognized environmental conditions.

The following data gap was identified for this Phase I ESA:

- The undefined first use of the subject property is considered a data gap. However, because the use of the subject property has been consistent from at least 1928 to the present and was never noted to be used for industrial purposes, this data gap does not limit the ability to determine RECs, and is therefore considered not significant.

Should Dudek receive information following submission of this Phase I ESA report that completes the data gap and changes the findings of the Phase I ESA report, Dudek will submit the findings to the User in an addendum.

13.2 Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, as reflected in the discussion in this report of the visual observations of the subject property and vicinity and documentation reviewed, and, based on the foregoing, our interpretation of this information and these documents. Dudek makes no warranty, guarantee, or representation, express or implied, as to statements made by others or information included in documentation reviewed or otherwise provided to Dudek, as described in this report. This report does not purport to identify or describe all potential contamination or other issues related to the environment respecting the subject property and/or vicinity. Likewise, it is understood that it is possible that conditions or contamination exist at the subject property or in the vicinity that are not identified in this Phase I ESA.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other

professionals performing the same or similar services in the same or similar geographical locality. This report, including its conclusions and/or recommendations, are intended exclusively and solely for the purpose outlined herein and for the client identified hereunder. This report may not be relied upon by any other person or entity without the express advance written consent of Dudek specifically identifying such person or entity. Dudek reserves the right to further condition any such third-party use based on matters it deems appropriate under the circumstances, in its sole discretion.

This report is subject to the conditions and restrictions and limitations described in ASTM E1527-21.

In accordance with Section 4.6.1 of ASTM E1527-21, this Phase I ESA is valid as a general matter for not longer than 180 days from the date of the first interview, first review of government records, or first visual inspection. If this Phase I ESA has been prepared for the purposes of a transaction, the report must have been completed no more than 180 days prior to the transaction date to be considered viable. Otherwise, the report must be updated or revised in accordance with ASTM E1527-21.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*	
P.O.#	9711.0001	**Latitude:**	36.958735 36° 57' 31" North

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within

approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	02-21-2020
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 02/24/2020. Facility does not list its hazardous waste in the hazardous materials inventory in CERS. Add the hazardous waste in the CERS hazardous materials inventory within 30 days.
Violation Division:	Santa Cruz County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-21-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site today to observe the management of hazardous materials/waste, training and record keeping. Facility has many chemicals that are kept in small containers. These chemicals are used in a chemistry lab. Facility generates hazardous waste and it is stored in a safe place. This container was missing a hazardous waste label and has been stored here for a year and a half, which is over the 6 month period in which it should have been disposed of. Dispose of this hazardous waste within 30 days and every 6 months after.This waste is also missing in the hazardous materials inventory in CERS. Facility is missing its EPA ID number. Obtain an EPA ID within 30 days if possible and add this number to your CERS submittal. Facility has not been training the instructor that works with the hazardous chemicals. Hold a training within 30 days and send a copy of the sign in sheet to Environmental Health along with the "Return to Compliance Form" provided on the back sheet of the [Truncated]

Violation Date: 03-19-2015
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 04/10/2015.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 164210
Site Name: U.S.G.S. PACIFIC SCIENCE CENTER
Violation Date: 02-02-2021
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator

U.S.G.S. PACIFIC SCIENCE CENTER (Continued) **S110743473**

accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 03/16/2021. Marfac area: Full 55 gallon drum of spent alkaline batteries located on the satellite accumulation pallet at the rear of the Marfac warehouse has a past due accumulation start date of 10/12/2019. Properly dispose of waste thru a licensed hauler by 2/16/2021. Contact Inspector Boone once pick-up is made with supporting hazwaste manifest.
Violation Division: Santa Cruz County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 164210
Site Name: U.S.G.S. PACIFIC SCIENCE CENTER
Violation Date: 02-02-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 03/16/2021. Marfac area: Small blue container in the Outdoor Wareyard does not have an accumulation start date on the label. Add start date or assume that it is past due and dispose of immediately. Instruct facility personnel to complete necessary labeling when dropping off oil, oily water waste, or other hazardous wastes.

Inspections were conducted of lab spaces within 2885 Mission Street, including the Marfac extension further down Mission Street. Comments below are for Marfac area: If necessary, please refer to the chemical compatibility chart provided when storing chemicals. Download/print out Safety Data Sheet for MEK (methyl ethyl ketone) and have available at all times. Three, 55 gallon drums of Bilge Waste

U.S.G.S. PACIFIC SCIENCE CENTER (Continued) **S110743473**

must be removed from roof of oil storage cabinet in Outdoor Wareyard.
Place drums in a location that provides proper secondary containment.
If adequate space cannot be found, arrange to have drums shipped ASAP.
The drums may also present an overhead safety hazard.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of

TEXAS INSTRUMENTS INCORPORATED (Continued) **U001601940**

accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: OBSERVATION: Failure of the Owner/Operator to comply with one or more satellite accumulation requirements.Failure to document monthly hazardous material/waste inspections. CORRECTIVE ACTION: Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. Inspect all hazardous material/waste containers monthly.

		NO SITES FOUND			

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2022
Date Data Arrived at EDR: 05/05/2022
Date Made Active in Reports: 05/31/2022
Number of Days to Update: 26

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2022
Date Data Arrived at EDR: 05/05/2022
Date Made Active in Reports: 05/31/2022

Next Scheduled EDR Contact: 10/10/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

415 NATURAL BRIDGES DRIVE
415 NATURAL BRIDGES DRIVE
SANTA CRUZ, CA 95060

TARGET PROPERTY COORDINATES

Latitude (North):	36.958735 - 36ˆ 57’ 31.45’’
Longitude (West):	122.057822 - 122ˆ 3’ 28.16’’
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	583879.7
UTM Y (Meters):	4090506.2
Elevation:	72 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12007839 SANTA CRUZ, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

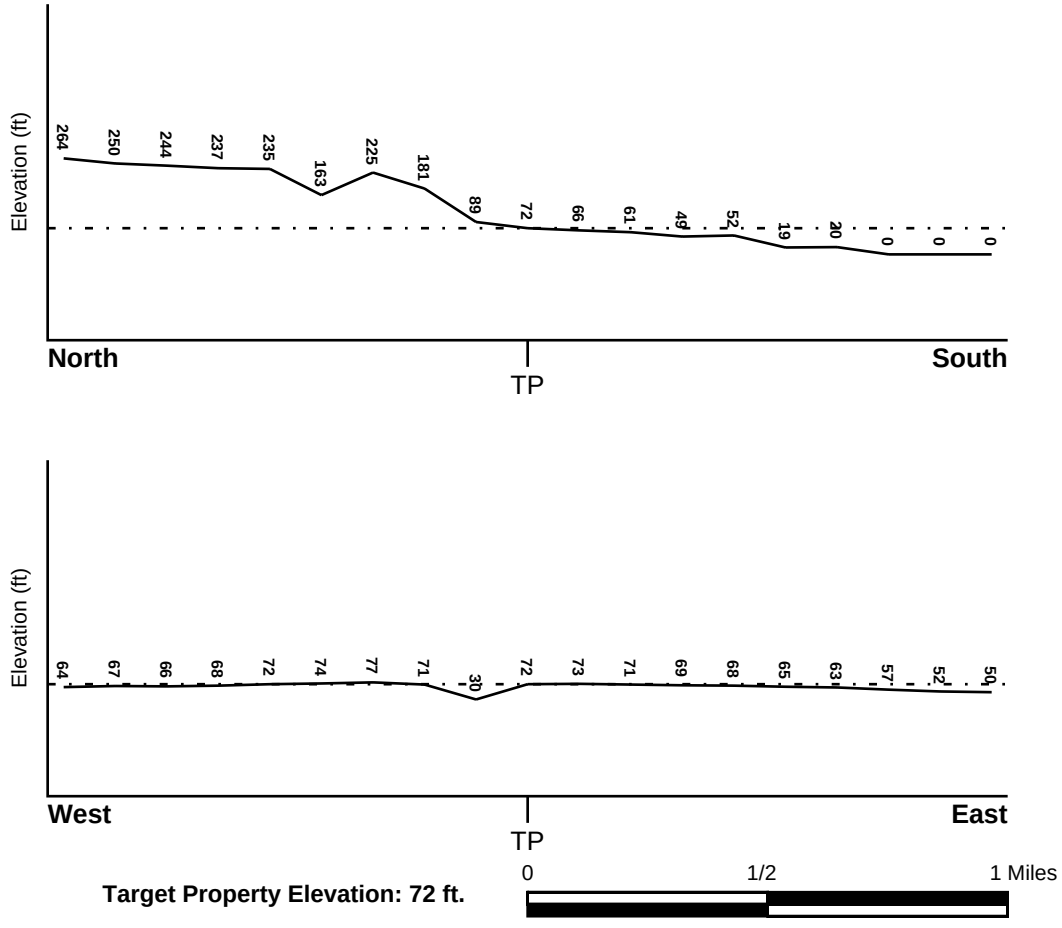

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06087C0333E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06087C0331E	FEMA FIRM Flood data
0603530350B	FEMA Q3 Flood data
0603550003B	FEMA Q3 Flood data
06087C0329E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SANTA CRUZ	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: WATSONVILLE

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 114 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
2	18 inches	38 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
3	38 inches	62 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Component Name: BONNYDOON

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

2	11 inches	14 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 9

Soil Component Name: SOQUEL

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

Soil Map ID: 10

Soil Component Name: BAYWOOD

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Appendix D
Owner-Provided Information

The ASTM Standard (E 1527-13, Section 10) for Phase I Environmental Site Assessments requires interviews with past and present owners and occupants of the property in order to obtain information on the history and uses of the property. Please answer the questions below to the best of your knowledge. Please provide additional information for all YES answers.

1. **Current Property Uses and Buildings:**

How long have you owned or occupied the property?

Housing Authority owned since November 18, 2013

Describe the current uses of the property.

Vacant lot

How long has the property been used for these purposes?

2015

Describe any buildings on the property and indicate the years they were constructed.

Site has been an empty lot since 2015.

2. **Past Uses:** Describe the past use(s) of the property and indicate the time period for each use, if known.

The site was originally developed in 1939 when an existing home was moved to the site. In 2015 the home was demolished and the site has remained an empty lot since then.

3. **Previous Owners/Operators:** Please identify previous owners and operators and provide their contact information (if available).

Musitelli Family Trust - no contact information

4. **Industrial Uses:** Please indicate whether the property or adjoining properties have been used for the following industrial uses. **Adjoining properties** include properties that are across the street from yours.

Industrial Use	Yes (Property)	Yes (Adjoining Property)	No
Gasoline Station	☐	☐	☑
Printing Facility	☐	☐	☑
Metal Plating Manufacturing	☐	☐	☑
Landfill	☐	☐	☑
Auto Repair/Service Facility	☐	☐	☑
Dry Cleaners	☐	☐	☑
Junkyard/Auto Dismantling	☐	☐	☑
Waste Treatment	☐	☐	☑
Other Industrial Use (please describe below):	☐	☐	☑

5. **Agricultural Uses:** Has the subject property ever been used for agricultural purposes?
☐ Yes ☐ No ☑ Unknown

If yes, please indicate whether any of the following have been present on the subject property.

Agricultural Use	Yes	No	Location
Cattle Hoof Wash	☐	☑	
Wheel Wash, Copper Solution or Other	☐	☑	
Orchards	☐	☑	Location, type, duration:
Orchard Heaters/Smudge Pots	☐	☑	
Pesticide/Herbicide/Fungicide Storage	☐	☑	Location, type, duration:
Pesticide/Herbicide/Fungicide Application	☐	☑	Location, type, duration:

6. **Dump/Burn Areas:** Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped above ground, buried, or burned on the property?
☐ Yes ☐ No ☑ Unknown

If yes, please describe:

7. **Hazardous Substances Storage:** Have any of the following items been stored on the property in containers *greater than 5 gallons*? If yes, please describe.

Substance	Yes	No	Substance and Container Size (e.g., waste oil in 55-gallon drum)
Paint	☐	☑	
Chemicals	☐	☑	
Solvents	☐	☑	
Pesticides	☐	☑	
Fuel	☐	☑	
Oil	☐	☑	
Other (please identify):	☐	☑	

8. **Hazardous Substances Spills:** Have there been spills of the substances in Question 6?
☐ Yes ☑ No ☐ Unknown
If yes, please describe:

9. **Pipelines:** Have hazardous substances or petroleum products been transferred across the property in pipelines, either above or below ground?
☐ Yes ☑ No ☐ Unknown
If yes, please provide the type of hazardous substance:

Have any spills occurred?

☐ Yes ☐ No ☑ Unknown

If yes, please describe:

10. **Fill Dirt:** Has fill dirt been brought onto the property from an off-site source?

☐ Yes ☑ No ☐ Unknown

If yes, what was the source of fill dirt?

If yes, was/is there evidence that the fill dirt in may be contaminated?

☐ Yes ☑ No ☐ Unknown

If yes, please provide soil sampling data, if available, or describe other evidence:

11. **Pits, Ponds, and Lagoons:** Are there currently any pits, ponds, or lagoons on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

Have any pits, ponds, or lagoons previously existed on the property?

☐ Yes ☐ No ☑ Unknown

If yes, please describe:

12. **Stained Soil:** Are there currently any areas on the property with stained soil?

☐ Yes ☑ No ☐ Unknown

If yes, please describe where, the size of stain, if there were odors, etc.:

Has stained soil previously existed on the property?

☐ Yes ☐ No ☑ Unknown

If yes, please describe where, size of stain, if there were odors, etc.:

13. **Storage Tanks:** Do underground or aboveground storage tanks exist or have they existed previously on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please provide details below. If tanks previously existed on the property, please describe how they were closed (e.g., removed, abandoned in place).

Tank Size	Year Installed	Contents	Closure Method (if applicable)	Year Closed (if applicable)

14. **Fill Pipes/Vent Pipes/Access Ways:** Do fill pipes, vent pipes, or access ways indicating the presence of underground storage tanks currently exist on the property?

☐ Yes ☑ No ☐ Unknown

Have fill pipes or vent pipes, which may indicate the presence of an underground storage tank, been removed from the property?

☐ Yes ☑ No ☐ Unknown

15. **Floor Drains:** Are floor drains stained with anything other than water or do they emit foul odors on the property?

☐ Yes ☑ No ☐ Unknown

16. **Private Well/Non-Public Water Source:** Is the property served by a private well or other non-public water source?

☐ Yes ☑ No ☐ Unknown

If yes, please describe source

Are contaminants known to exist in any private well or non-public water system serving the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

17. **Wastewater:** Does the property discharge wastewater, other than domestic wastewater or stormwater, into the sewer?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

Does a neighboring property discharge wastewater, other than stormwater, onto the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

Other than permission for domestic hookup, has any type of permit(s) for wastewater discharge been issued to the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

18. **Septic Tank:** Does a septic tank exist, or has one existed previously at the property?

☐ Yes (currently exists) ☐ Yes (previously existed, was removed) ☐ No ☑ Unknown

19. **Cesspools/Cisterns:** Do cesspools or cisterns currently exist on the property?

☐ Yes (cesspool) ☐ Yes (cistern) ☑ No ☐ Unknown

Have cesspools or cisterns previously existed on the property?

☐ Yes (cesspool) ☐ Yes (cistern) ☐ No ☑ Unknown

20. **Transformer/Capacitor**: Is there a transformer or capacitor on the property?

☐ Yes ☑ No ☐ Unknown

If yes, is it known to contain PCBs?

☐ Yes ☐ No ☐ Unknown _____

21. **Hydraulic Equipment:** Is there any hydraulic equipment such as automobile lifts or elevators on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe type and number of equipment:

If yes, is the hydraulic oil known to contain PCBs?

☐ Yes ☐ No ☐ Unknown

22. **Surveys:** Has an asbestos and/or lead based paint survey been conducted at the property?

☐ Yes ☑ No ☐ Unknown

If yes, when was the survey(s) conducted? Please provide copies of the reports if available.

23. **Pesticides:** Have pesticides, herbicides, or insecticides been applied on the property?

☐ Yes ☐ No ☑ Unknown

If yes, describe type and when they were used:

24. **Environmental Cleanups:** Are you aware of any environmental cleanups/remediation that have occurred on the property?

☐ Yes ☑ No ☐ Unknown

25. **Notice of Violation:** Have notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products associated with activities conducted on the property been issued?
☐ Yes ☐ No ☑ Unknown

26. **Documents:** Has the property been included in any of the following documents? (Please provide any of the available documents.)

Document	Yes	No	Unknown
Phase I or II Environmental Assessment Reports	☐	☐	☑
Environmental Compliance Audits	☐	☐	☑
Environmental Permits	☐	☐	☑
Underground or Aboveground Tank Registrations	☐	☐	☑
Underground Injection System Registrations	☐	☐	☑
Health & Safety Plan / Safety Data Sheets	☐	☐	☑
Community Right-to-Know Plan	☐	☐	☑
Spill Prevention, Control, and Countermeasure Plan	☐	☐	☑
Hazardous Materials Business Plan	☐	☐	☑
Sampling, Remediation, or Risk Assessment Reports	☐	☐	☑
Hazardous Waste Generator Manifests	☐	☐	☑
Geotechnical Reports	☑	☐	☐

27. **Environmental** Assessments**:** Are there any other environmental assessments that identified hazardous substances or petroleum products on the property?
☐ Yes ☑ No ☐ Unknown
If yes, please describe:

28. **Litigation/Administrative Proceedings:** Is there any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products associated with the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

29. **Additional Knowledge:** Are you aware of any other information (not provided above) about the property related to a releases or potential release of hazardous substances or petroleum products?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

Subject: Public Records Request

Hi there, my name is Stephanie Chao, I work for a company called Dudek. I would like to submit a records request pertaining to two sites at the following addresses/APNs: (1) 415 Natural Bridges Drive, Santa Cruz, CA 95060, APN: 003-011-06 and (2) 2929 Mission Street, Santa Cruz, CA 95060, APN: 003-011-10. Particular records of interest would include records related to any spills or releases, building, hazardous materials, and aboveground or underground storage tank permits.

Thanks!

Stephanie Chao

Subject: RE: Public Records Request

Hi Stephanie,

All our agency's public documents can be found on the Environmental Health Website: https://scceh.org/NewHome/EnvironmentalHealthDocuments.aspx. You will need Adobe Acrobat Reader installed on your computer device to view our documents. To get this free reader, go to: https://get.adobe.com/reader/.

Instructions and tips for using the online database search feature are on the webpage; however, tips for searching the website are as follows:

- Click on "All Documents"
- In the "Enter Facility or Address or APN" box, type the address you are researching (e.g., "123 Main*"). The "*" provides better search results in case a wrong designation for the address was entered (e.g., street, avenue, drive, etc.).
- Click "Submit"
- It may take a few minutes to generate any reports.
- This will provide you with all the documents for the site. There are two search pages (see bottom left buttons to click between pages).

If you have further questions, the Environmental Health Inspectors are in the office for calls between 8:00-9:30 am Monday-Friday.

Sincerely,

John Gerbrandt, PG, REHS | Professional Geologist

PUBLIC INFORMATION REQUEST

The California Public Records Act (Government Code Section 6250 et seq.) requires public agencies to make their records available for inspection to every person during office hours unless the records are exempt from disclosure. Within 10 days of receiving the request form, you will receive notification from this office determining when the records will be disclosed or informing you that the records are exempt from disclosure.

Please indicate the records you are requesting and be as specific as possible.
(For example, indicate the year of the record, the specific party the record pertains to, property locations, the type of record you are requesting such as pesticide use records.)

Records pertaining to any historical or current agricultural or pesticide use on the properties located at 415 Natural Bridges Drive (APN: 003-011-06) and 2929 Mission Street (APN: 003-011-10). Both locations are located in the County of Santa Cruz with the zip code 95060.

Please indicate the format preference: _____paper copy _____CD x_____e-mail
The information will be provided in the electronic media format requested if it is a format used.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	367387
Site Name:	Pacific Collegiate School
Violation Date:	02-21-2020
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 02/24/2020. Facility does not list its hazardous waste in the hazardous materials inventory in CERS. Add the hazardous waste in the CERS hazardous materials inventory within 30 days.
Violation Division:	Santa Cruz County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-21-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site today to observe the management of hazardous materials/waste, training and record keeping. Facility has many chemicals that are kept in small containers. These chemicals are used in a chemistry lab. Facility generates hazardous waste and it is stored in a safe place. This container was missing a hazardous waste label and has been stored here for a year and a half, which is over the 6 month period in which it should have been disposed of. Dispose of this hazardous waste within 30 days and every 6 months after.This waste is also missing in the hazardous materials inventory in CERS. Facility is missing its EPA ID number. Obtain an EPA ID within 30 days if possible and add this number to your CERS submittal. Facility has not been training the instructor that works with the hazardous chemicals. Hold a training within 30 days and send a copy of the sign in sheet to Environmental Health along with the "Return to Compliance Form" provided on the back sheet of the [Truncated]
