

Sandbag Disposal

Unused sandbags, or sandbags that have only come into contact with precipitation, can be stored and re-used. However sandbags that have come into contact with storm or flood water should not be re-used.

Such contaminated sandbags should not be placed in curbside refuse containers for pickup due to their heavy weight. Instead, they may be dropped off at the City landfill, 605 Dimeo Lane.

Used sandbags may also be disposed of by dumping the sand in your yard (not in a drain) and throwing the remaining bag in the trash.

If you plan to re-use your sandbags, be sure to store them in a dry place.
